FUEL CARD REPORTING IN WEBFLEET

WEBFLEET
TOMTOM TELEMATICS

FLEETCOR Integration with WEBFLEET

Fuel card

What's new: WEBFLEET integrates fuel card data to give you insights on:

- When and where the fuel card was used
- Total costs of fuel purchases
- Amount of fuel purchased
- Fuel type
- Fuel card usage exceptions to detect potential misuse

Businesses don't have to use multiple services for getting insights into fuel usage and fuel card purchases.

Get it all with WEBFLEET.

Benefits

Be aware of all fuel card purchase information

All fuel card purchases per vehicle are shown in WEBFLEET

Increase convenience

No need to open another platform. All the information is available from WEBFLEET.

Know when a fuel card is potentially being misused

Fuel purchase exceptions are triggered when a purchase looks suspicious, e.g. the location that the card was used differs from the location of the vehicle, which the fuel card was assigned to

Fuel card purchase exceptions

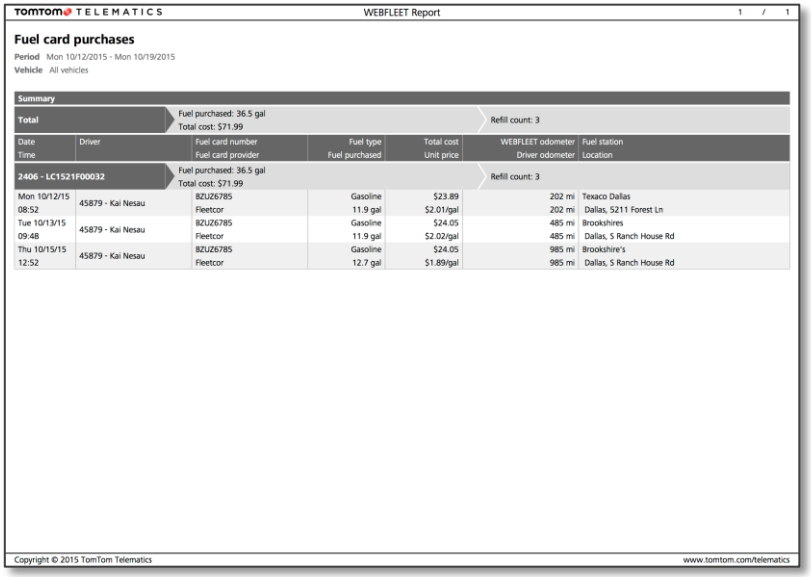
Fuel card purchase exceptions are triggered by combining the fuel card data and WEBFLEET data. These exceptions can indicated potential fuel card misuse by using the following parameters:

- The locations of the fuel card purchases and the vehicle differ
- The vehicle did not move before and/or after the time the fuel was purchased
- Fuel purchased was more than the fuel tank capacity of the vehicle
- The fuel type (e.g. gasoline or diesel) did not correspond for the vehicle
- Large deviation of reported fuel consumption by the TomTom ecoPLUS

Fuel Card Reports

Fuel card purchase

- Summary of the total amount of fuel purchased and costs from all your vehicles using fuel cards
- Detailed information on fuel purchased for each vehicle including information about:
  - Fuel card number and fuel card provider
  - Fuel type
  - Gallons and costs per refuel*
  - Location of the petrol station*



TOMTOM TELEMATICS — WEBFLEET Report — 1 / 1
