# TomTom PRO

## 1. What's in the box

---

- TomTom PRO

- Easy Click mount

- USB cable

- USB car charger

- Installation poster

## 2. Read me first

---

### EasyClick mount

Use the EasyClick mount to install your TomTom PRO inside your car.

Make sure that both the EasyClick mount and your windscreen are clean and dry before you attach the mount. Place the EasyClick mount so that it does not interfere with your view of the road or of any of the controls in your car.

To attach the EasyClick mount, press the suction cup firmly against the windscreen on an area where the glass is flat. Then twist the rubber grip near the base of the mount in a clockwise direction until you hear a click.

Plug the cable into your car dashboard and connect the other end to the bottom of your device.

### Switching on and off

To switch on your navigation device, press and hold the On/Off button until you see the start-up screen. The first time you switch on your device, it may take a short time to start.

### Setting up

---

**Important:** Take care to select the correct language, since the language you choose will be used for all text on the screen.

---

When you first switch on your device, you have to answer a few questions to set up the device. Answer the questions by tapping the screen.

### GPS reception

When you first start your TomTom PRO navigation device, the device may need a few minutes to determine your GPS position and show your current position on the map. In future, your position will be found much faster, usually within a few seconds.

To ensure good GPS reception, you should use your device outdoors. Large objects such as tall buildings can sometimes interfere with reception.

When your navigation device is used in combination with a LINK, the GPS receiver in the LINK is used by default.

### About MyTomTom

MyTomTom helps you manage the contents, maps and services of your TomTom PRO navigation device, as well as giving you access to the TomTom community. It is a good idea to frequently connect your navigation device to MyTomTom, to ensure you always have the latest updates. You can also log in to MyTomTom on the TomTom website.

---

**Tip:** We recommend using a broadband internet connection whenever you connect your navigation device to MyTomTom.

---

## Setting up MyTomTom

To set up MyTomTom, do the following:

1. Connect your computer to the internet.
2. Start a browser and go to **business.tomtom.com/getstarted**.
3. Click **Download now**.

Your browser downloads the MyTomTom support application, which you need to install on your computer in order to connect your device to MyTomTom. Follow the instructions on the screen if you are asked questions while downloading.

4. When prompted, connect the mount for your device to your computer using the supplied cable. Then place your device in the mount and switch your device on.

---

**Important:** You should plug the USB connector directly into a USB port on your computer and not into a USB hub or USB port on a keyboard or monitor.

---

Once the MyTomTom support application is installed, you can access MyTomTom from the notification area on your desktop.

---

**Tip:** When you connect your navigation device to your computer, MyTomTom tells you if there are any updates for your device.

---

## Device not starting

In rare cases, your TomTom PRO navigation device may not start correctly or may stop responding to your taps.

First, check that the battery is properly charged. To charge the battery, connect your device to the car charger. It can take up to 2 hours to fully charge the battery.

If this does not solve the problem, you can reset the device. To do this, press and hold the On/Off button for 15 seconds and release the button when your device begins to restart.

## Charging your device

The battery in your TomTom PRO navigation device charges when you connect it to the car charger or to your computer.

The light on the On/Off button is orange while the battery is charging and is green when the battery is fully charged.

---

**Important:** You should plug the USB connector directly into a USB port on your computer and not into a USB hub or USB port on a keyboard or monitor.

---

## **Safety Notice**

The following information applies only to TomTom PRO 9xxx devices.

Some TomTom navigation devices contain a GSM/GPRS module which can interfere with electrical devices such as cardiac pacemakers, hearing aids and aviation equipment.

Interference with these devices may endanger the health or life of you or others.

If your device includes a GSM/GPRS module, do not use it near unprotected electrical units or in areas where the use of mobile telephones is prohibited, such as hospitals and airplanes.

## **Take care of your navigation device**

Never leave your TomTom PRO or accessories on view when you leave the car as they may become an easy target for thieves.

It is important to take care of your device:

- Your device is not designed for use in extreme temperatures and any such exposure may cause permanent damage. Extended exposure to sun light may lead to early deterioration in battery performance.
- Do not open the casing of your device under any circumstances. Doing so may be dangerous and will invalidate the warranty.
- Wipe or dry the screen of your device using a soft cloth. Do not use any liquid cleaners.

## 3. Safety

### Positioning the EasyClick Mount

Consider carefully where to attach the mount in your car. The mount should not block or interfere with any of the following:

- Your view of the road
- Any of the controls in your car
- Any of your mirrors
- The airbag

When your navigation device is in the mount, you should be able to reach the device easily without leaning or stretching. You can attach the mount to the windscreen, side window or use a Dashboard Mount Disk to attach the mount to your dashboard. The following diagrams show where you can safely attach the mount.

TomTom also offers alternative mounting solutions for your TomTom navigation device. For more information about Dashboard Mount Disks and alternative mounting solutions, go to [business.tomtom.com/accessories](https://business.tomtom.com/accessories).

### Installing the mount

Make sure that both the mount and your window are clean and dry.

1. Press the suction cup firmly against the window on an area where the glass is flat.
2. Twist the locking wheel in a clockwise direction as far as it goes.

The mount is now installed and you can place your device on the mount.

### Safety settings

We recommend using the safety settings to make your driving as safe as possible.

These are some of the options included in the safety settings:

- Show essential menu buttons while driving
- Show safety reminders
- Warn when driving faster than allowed

You can also drive more safely by using voice commands to control your TomTom PRO.

## 4. Connecting to LINK and WEBFLEET

---

*The following information applies when you want to connect your TomTom PRO 7xxx to a TomTom LINK. To connect your TomTom PRO 9xxx to WEBFLEET, read **Connecting to WEBFLEET** (9).*

Connect your TomTom PRO device to your TomTom LINK to fully enjoy the benefits of Connected Navigation.

When you first switch on your PRO device, you are asked to connect it with the LINK installed in your vehicle. You can do this immediately or at a later time.

1. Make sure that the LINK is connected to power and has a GPRS connection (see TomTom LINK Installation Guide).
2. Switch on your PRO device.
3. Tap the screen to bring up the Main Menu.
4. Tap **WORK**.

You are asked to start the activation process. After you have started the activation process your PRO device searches for Bluetooth devices.

If your PRO device finds more than one Bluetooth device, it shows a list of the available devices. Continue with step 5.

If your PRO device finds only one LINK, continue with step 6.

5. Select your LINK from the list.

The name starts with LINK followed by the serial number of your LINK or the licence plate number of your vehicle. You can find the serial number on the outside of your LINK.

6. Enter the activation code, found in your WEBFLEET contract confirmation.
7. Enter the licence plate number of the vehicle.

If you have properly connected the two devices, you receive a welcome message from WEBFLEET confirming the activation. In future the connection is established automatically.

To check the connection status between the two devices, tap **Settings** in the **WORK** menu on your navigation device, then tap **Connection status** (see **Connection status** (64)).

## 5. Connecting to WEBFLEET

---

*The following information applies when you want to connect your TomTom PRO 9xxx to WEBFLEET. To connect your TomTom PRO 7xxx to a LINK, read **Connecting to LINK and WEBFLEET** (7).*

Activate your PRO to fully enjoy the benefits of Connected Navigation.

When you first switch on your PRO device, you are asked to activate it. You can do this immediately or at a later time.

1. Switch on your PRO device.
2. Tap the screen to bring up the Main Menu.
3. Tap **WORK**.

You are asked to start the activation process.

4. Enter the Activation Code, found in your WEBFLEET contract confirmation.

If your PRO device finds more than one subscription to which it can be assigned, it shows a list of the available subscriptions. Continue with step 5.

If your PRO device finds only one subscription, continue with step 6.

5. Select your subscription from the list.
6. Enter a name for your device.

Your device is labelled in the TomTom WEBFLEET service with this name.

7. Enter the licence plate number of the vehicle.

If you have successfully activated your PRO device, you receive a welcome message from WEBFLEET confirming the activation. In future the connection is established automatically.

To check the connection status between the PRO and WEBFLEET, tap **Settings** in the **WORK** menu on your navigation device, then tap **Connection status** (see **Connection status** (64)).

## 6. Planning a route

---

**Important:** In the interest of safety and to reduce distractions while you are driving, you should always plan a route before you start driving.

---

To plan a route on your TomTom PRO, do the following:

1. Tap the screen to open the Main menu.

2. Tap **Navigate to...**
3. Tap **Address**.

**Tip:** The first time you plan a route, you are asked to select a country, state or region. Your selection is saved and used for all future routes until you change this setting.

You can change this setting by tapping the flag before you select a city.

---

4. Enter the town or city name.

**Tip:** Instead of typing the address, tap the microphone button to enter the address by speaking to your PRO.

---

- Towns with similar names are shown in the list while you type.
- When the correct city or town appears in the list, tap the name to select the destination.

5. Enter the streetname.

- Streets with similar names are shown in the list while you type.
- When the correct streetname appears in the list, tap the name to select the destination.

6. Enter the house number, then tap **Done**.

7. The location is shown on the map. Tap **Select** to continue or tap **Back** to enter another address.

---

**Tip:** If you want your final destination to be a car park, tap **Park nearby** and select a location from the list of car parks close to your general destination.

---

8. Select the type of route you want to plan.

9. When the new route is shown, tap **Done**.
- For more information about the route, tap **Details**.
  - To plan a different route, tap **Change route**.

Your TomTom PRO starts to guide you to your destination, using spoken instructions and onscreen directions.

### Route summary

The route summary shows an overview of your route, the remaining distance to your destination and the remaining estimated journey time.

To view the route summary, tap the right-hand panel on the status bar in the Driving view or tap **View route** in the Main menu and then tap **Show route summary**.

When used with TomTom Traffic, the route summary shows an overview of your route, the remaining distance to your destination, the remaining estimated journey time and traffic information about delays on your route.

### LIVE summary

LIVE summary shows LIVE services information on your route.

To view LIVE summary information, tap the LIVE tab on the route summary screen. Tap any of the panels for more detailed information.

The LIVE tab panels show the following information:

- **Traffic on route** - tap this panel to view detailed information about traffic delays and other incidents on your route.
- **Speed cameras** - tap this panel to open the Speed Camera menu. You can then report a speed camera or change your settings for speed camera warnings.
- **Weather** - tap this panel to view the latest weather reports.

**Note:** LIVE services are only available in designated countries. In order to benefit from LIVE services, the respective WEBFLEET subscription is needed. For more information on available services in your country, go to [business.tomtom.com/liveservices](http://business.tomtom.com/liveservices).

## Using your voice to plan a route

Instead of tapping the screen to plan a route, you can use your voice to plan a route.

For information about planning a route using your voice, see *Voice command and control*.

## Frequent destinations

If you often make trips to the same destinations, you can set your TomTom PRO to ask if you want to plan a route to one of these locations, every time the device starts. This is faster than planning a route in the normal way.

To select a new destination, tap **Start-up settings** in the Settings menu and select **Ask for a destination**. Then select a button to use for this destination and answer the questions about the destination.

## Show my frequent destinations

You can set your TomTom PRO to ask if you want to plan a route to one of your frequently visited destinations every time the device starts.

To change this setting, do the following:

1. Tap **Start-up settings** in the Settings menu and then select **Ask for a destination**.
2. Tap **Yes**, then tap **Yes** again to begin entering information about the destination.
3. Select a symbol for the destination and tap **Done** to set the symbol, then tap **Yes**.

---

**Tip:** To add new destinations, select one of the numbered symbols and enter a name for the new destination button.

---

4. Tap **Yes** and if required enter a new name, then tap **Done**.
5. Enter the address details in the same way you enter an address when planning a route, then tap **Done**.
6. If you want to set more destinations, repeat the steps above. Otherwise, tap **Done**.

You are asked if you want to change the start-up image.

7. If you want to change the image, tap **Yes** then follow the instructions shown on the screen. Otherwise, tap **No**.

Every time your TomTom PRO starts, you are asked if you want to plan a route. If you tap **Cancel**, you are shown the Main Menu.

## Using arrival times

When you plan a route, your TomTom PRO asks you if you need to arrive at a particular time.

Tap **YES** to enter a preferred arrival time.

Your PRO calculates your arrival time and shows you whether you will arrive on time.

You can also use this information to work out when you need to leave. If your PRO shows that you will arrive 30 minutes early, you can wait and leave in 30 minutes time, rather than arrive early.

Your arrival time is constantly recalculated during your journey. The status bar shows whether you will arrive on time or if you are going to be late, as shown below:

	<p>You will arrive 55 minutes before the arrival time you entered.</p> <p>If the estimated arrival time is more than five minutes before the time you entered, it is shown in green.</p>
	<p>You will arrive 3 minutes before the arrival time you entered.</p> <p>If the estimated arrival time is less than 5 minutes before the time you entered, it is shown in yellow.</p>
	<p>You will arrive 19 minutes late.</p> <p>If the estimated arrival time is later than the time you entered, it is shown in red.</p>

Tap **Status bar settings** in the Settings menu, to enable or disable arrival time notifications.

To enable arrival time notifications, select **Leeway**.

## Navigation menu options

When you tap **Navigate to...**, you can set your destination in many ways, not just by entering the address. The other options are listed below:

 <b>Local search</b>	<p>Tap this button to use TomTom Local Search with TomTom Places to help you find shops and businesses in and around your current location.</p> <p>You can choose to search for shops and businesses near you, near your destination, near any other destination or in a city.</p> <p>For example, if you are looking for a swimming pool near your current location, enter 'swimming pool' and choose the best search result.</p>
 <b>Home</b>	<p>Tap this button to navigate to your Home location.</p> <p>You will probably use this button more than any other.</p>
 <b>Favourite</b>	<p>Tap this button to select a Favourite as your destination.</p>
 <b>Address</b>	<p>Tap this button to enter an address as your destination.</p>
 <b>Recent destination</b>	<p>Tap this button to select your destination from a list of places you have recently used as destinations.</p>
 <b>Point of Interest</b>	<p>Tap this button to navigate to a Point of Interest (POI).</p>
 <b>Point on map</b>	<p>Tap this button to select a point on the map as your destination using the map browser.</p>
 <b>Latitude Longitude</b>	<p>Tap this button to enter a destination using latitude and longitude values.</p>
 <b>Position of last stop</b>	<p>Tap this button to select your last recorded position, as your destination.</p>

## Planning a route in advance

You can use your TomTom PRO to plan a route in advance, selecting your starting point and your destination.

Here are some more reasons to plan a route in advance:

- Find out how long a journey is going to take before you start.

You can also compare journey times for the same route at different times of the day or on different days of the week. Your PRO uses IQ Routes when planning a route. IQ Routes calculates routes based on the real average speeds measured on roads.

- Study the route of a journey you are planning.
- Check a route for someone who is coming to visit you and then explain the route to them in detail.

To plan a route in advance, follow these steps:

1. Tap the screen to bring up the Main menu.
2. Tap the arrow button to move to the next menu screen and tap **Plan route**.

This button is shown while there is no planned route on your PRO.

### **Prepare route**

3. Select the starting point for your journey in the same way that you would select your destination.
4. Set the destination for your journey.
5. Choose the type of route that should be planned.
  - **Fastest route** - the route which takes the least time.
  - **Eco route** - the most fuel-efficient route for your journey.
  - **Shortest route** - the shortest distance between the locations you set. This may not be the quickest route, especially if the shortest route is through a town or city.
  - **Avoid motorways** - a route which avoids motorways.
  - **Walking route** - a route designed for making the journey on foot.
  - **Bicycle route** - a route designed for making the journey on a bicycle.
6. Choose the date and time that you will make the journey you are planning.

Your PRO uses IQ Routes to work out the best possible route at that time. This is useful to see how long a journey takes at different times of the day or on different days of the week.

7. Your TomTom PRO plans the route between the two locations you selected.

## Viewing route information

You can access these options for the route you last planned by tapping **View route** in the Main Menu or the **Details** button on the route summary screen.

You can access these options for the route you last planned by tapping the **Details** button on the route summary screen.

You can then select from the following options:

**Show instructions**

Tap this button for a list of all the turn instructions on the route.

This is very useful if you need to explain a route to someone else.

**Show map of route**

Tap this button to see an overview of the route using the map browser.

**Show route demo**

Tap this button to watch a demo of the journey. You can interrupt the demo at any time by tapping the screen.

**Show route summary**

Tap this button to open the route summary screen.

**Show destination**

Tap this button to see a preview of your destination.

You can navigate to a car park near your destination, call your destination if a phone number is known, and view any available information about your destination.

**Show traffic on route**

Tap this button to see all the traffic incidents on your route.

**Note:** This button is only shown if your device has either an HD Traffic subscription or an RDS-TMC Receiver connected. Traffic information is not available in all countries or regions. For more information about TomTom traffic information services, go to [tomtom.com/services](http://tomtom.com/services).

## 7. Voice control

---

### About voice control

Instead of tapping the screen to control your TomTom PRO, you can use your voice to control your PRO.

For example, to increase the volume on your PRO, you can say, "Increase volume."

To view the list of available commands, tap **Help** in the Main menu or the Settings menu then tap **Product manuals** and then tap **What can I say?**

---

**Important:** Voice control requires a computer voice. When there are no computer voices installed on your TomTom PRO, this feature is not available.

To select a computer voice, tap **Voices** in the Settings menu, then tap **Change voice** and select a computer voice.

---

### Using voice control

To enable voice control and show the button in the Driving view, tap **Make your own menu** in the Settings menu and select the checkbox for **Voice control**.

To switch off voice control and remove the button from the Driving view, tap **Make your own menu** in the Settings menu and clear the checkbox for **Voice control**.

The following example shows how to use voice control to plan a journey to your Home address.

1. Tap the microphone button in the Driving view to turn on the microphone.

The microphone monitor is shown on the right-hand side of the screen.

2. When you hear the tone, say, "Navigate to Home".

While you are speaking the microphone monitor shows how well the device can hear your voice:

A green bar means the device can hear your voice.

A red bar means your voice is too loud for the device to recognise individual words and understand everything you say.

A grey bar means your voice is too quiet for the device to recognise individual words and understand everything you say.

For some phrases, your PRO repeats what you say and asks for confirmation.

3. If the command is correct, say, "Yes."

If the command is incorrect, say, "No" and repeat the command after you hear the tone.  
Your PRO plans a route from your current location to your Home address.

---

**Tip:** To stop your PRO from listening out for further commands, say "Back" or "Cancel" or "Quit" or simply tap the screen.

---

## Planning a journey using your voice

---

**Important:** In the interest of safety and to reduce distractions while you are driving, you should always plan a route before you start driving.

---

**Note:** *It's not possible to plan a route using your voice for all maps in all countries, or in all languages.*

To plan a route to an address using speech, do the following:

1. Tap the voice control button in the Driving view.
2. When you hear the tone, say, "Navigate to address".
3. Say the name of the town.

Your PRO shows a list of towns which sound similar to what you said and tells you which town is at the top of the list.

If the town you hear is the same as the town you requested then say, "Done" or "OK" or "Yes" or "One" or tap the town at the top of the list.

If the town you hear is incorrect, but the correct town is in the list, say the number next to the correct town or tap the name of the town.

For example, if the correct city is Paris and this town is shown at the third item in the list, you can say, "Three" or tap the name, **Paris**.

If the name is not in the list, then say "Back" or "No" or tap **Back** to return to the previous screen and say the town again when you hear the tone.

4. Say the streetname.

Your PRO shows a list of streetnames which sound similar to what you said and tells you which streetname is at the top of the list.

If the streetname you hear is the same as the streetname you requested then say, "Done" or "OK" or "Yes" or "One" or tap the streetname at the top of the list.

---

**Tip:** Different locations may have the same name, such as a road that spans multiple postcodes. When this happens you need to look at the screen and tap the correct location.

---

If the street name you hear is incorrect, but the correct streetname is in the list, say the number next to the correct streetname or tap the streetname in the list.

If the streetname is not shown in the list, say "Back" or "No" or tap **Back** to return to the previous screen and then say the streetname again when you hear the tone.

5. Say the house number.

---

**Important:** Numbers need to be spoken in the same language as the button names and menus on your TomTom PRO.

---

Numbers should be pronounced in the same way you normally say a number, in one continuous sentence. So 357 is pronounced, "Three hundred and fifty seven."

If the number is shown correctly then say, "Done" or "OK" or tap the keyboard to enter the number.

If the number is shown incorrectly then say, "Back" or "No" or tap the Backspace key and repeat the number.

---

**Tip:** If you say, "Back" when there are no numbers on the screen, your PRO will return you to the previous screen.

---

When the number is shown correctly say, "Done" or "OK." Alternatively, enter the number by tapping the screen.

6. When the route has been calculated and the route summary is shown, tap **Done**.

Your TomTom PRO starts to guide you to your destination, using spoken instructions and onscreen directions.

## Entering addresses using your voice

---

**Important:** In the interest of safety and to reduce distractions while you are driving, you should always plan a route before you start driving.

---

Even if you don't use voice control to start planning a journey, you can still use your voice to enter the address.

To start planning a journey tap **Navigate to...** in the Main menu, then tap **Address**.

To enter the destination using your voice, tap one of the following buttons:

Tap this button to enter an address entirely using speech.

**Spoken address** helps you to enter information without tapping the screen.

This option recognises the following spoken terms:

- Commands: Yes, No, Back, Done, OK, Crossing.
- Streetnames.
- Cities and towns and their centres.
- Favourites, postcodes and POIs.
- Plan alternative route, Recalculate original, Avoid roadblock, Minimise delays, Clear route, Travel via... and Recent destination.
- Numbers. These should be pronounced in the same way you normally say a number, in one continuous sentence. So 357 is pronounced, "Three hundred and fifty seven."

Tap this button at the base of the keyboard to use speech to enter an address. When the button is grey, you cannot use speech to enter an address.

This button is available for the for the following types of destination:

- **City centre** - to select a city or town centre.
- **Street and house number** - to select an address.
- **Crossing or intersection** - to select the point where two streets meet.

---

**Tips:**

- Your PRO recognises places and streetnames when they are spoken in the local language using local pronunciation.
  - Spoken address entry is not possible for postcodes which must be entered using the keyboard.
  - Spoken address entry is not available for all maps in all countries.
-

## 8. Driving View

### About the Driving View

When your TomTom PRO device starts for the first time, you are shown the Driving View along with detailed information about your current position.

Tap the centre of the screen at any time to open the Main Menu.

You can choose the screen shown when you switch on your device by tapping **Settings** in the Main Menu, then tapping **Start-up settings**.

### Driving View

When your TomTom PRO starts, you are shown the Driving View along with detailed information about your current location.

Tap the centre of the screen at any time to open the Main Menu.

1. Zoom button - tap the magnifying glass to show buttons for zooming in and out.
2. Quick menu containing WORK status icons - switch this on and off in the Settings menu.

When your navigation device and WEBFLEET are first activated, the quick menu contains the buttons **Active order** and **Change logbook** or **Report work time**.

3. WORK status icons. These icons give you fast access to order and reporting information. Here are some of the status icons:

**Status of order** - the current status of order when you are on a business trip or in work time. Each status has a different icon. Click the icon to see the order.

**Start work** - indicates that you have started work. This icon is only shown if **Report work time** is active.

**Pause** - indicates that you selected that you are taking a break. This icon is only shown if **Report work time** is active.

**End of work** - indicates that you have finished work.

**Private trip** - indicates that you selected that you are on a private trip. This icon is only shown when **Change logbook mode** is active.

**Locating disabled** - if locating is disabled, the position of your vehicle is not tracked by TomTom WEBFLEET. Locating can be disabled when you are on private trips, taking a break or have finished work. When locating is disabled, the status icon is shown but is greyed out.

4. New incoming messages or orders. Tap this icon to show the latest unread message or order.
5. Your current position.
6. The name of the next major road or road sign information, if applicable.
7. Traffic sidebar.
8. Connection indicator - shows that your navigation device has a connection to WEBFLEET. When the connection is lost, a cross is shown.
9. The time, your current speed and the speed limit, if known. To see the difference between your preferred arrival time and your estimated arrival time, check the **Leeway** checkbox in Status bar settings.

Tap this part of the status bar to switch between a 3D map and a 2D map.

10. The name of the street you are on.
11. Navigation instruction for the road ahead and the distance to next instruction. If the second instruction is less than 150m after the first instruction, you see it shown immediately instead of the distance.

Tap this part of the status bar to repeat the last voice instruction and to change the volume. You can also tap here to mute the sound.

12. The remaining journey time, the remaining distance and your estimated arrival time.

Tap this part of the status bar to open the Route Summary screen.

To change the information shown, tap **Status bar settings** in the **Settings** menu.

### Active driver feedback

Your TomTom PRO helps you improve your driving behaviour. The Driving View shows real-time alerts to remind you to drive in a safer and more fuel-efficient way.

1. The following alerts are shown.\*

**Driving event** - you are driving in a dangerous way, for example, you are cornering too fast or breaking too hard.

**Idling** - the vehicle has been standing still with the engine running for longer than five minutes. The amount of wasted fuel is shown when it is greater than 0,1l.

2. Fuel efficiency indicators.

**Efficient fuel use** - this icon is shown when you are using at least 10% less fuel than the average value for your vehicle.

**Inefficient fuel use** - this icon is shown when you are using at least 10% more fuel than the average value for your vehicle.

These icons indicate your fuel efficiency measured against an average value which is configured by the dispatcher.\*\* These icons are not shown, when the status bar is configured to show the current fuel consumption (3) and the average fuel consumption (4).

3. The current fuel consumption rate.\*\*

4. The average fuel consumption rate of the current trip.\*\*

*Note: The current and the average fuel consumption rates are shown in red or in green in the same way as the fuel efficiency indicators above.*

To see detailed information about the safety and efficiency of your driving style per trip, per day and overall, see **Active driver feedback on page**.

\* *Installed TomTom LINK required.*

\*\* *Installed TomTom ecoPLUS and LINK required.*

## Driving View symbols

The following symbols are shown in the Driving View:

	Mobile phone not connected - this symbol is shown when the selected mobile phone is not connected to your device. You must have already established a connection to this phone.
	Sound muted - this symbol is shown when the sound has been muted.  To turn the sound back on, tap the middle panel in the status bar.
	Battery - this symbol is shown when the battery level is low.  When you see this symbol, you should charge your navigation device as soon as possible.

## 9. Active driver feedback

Your TomTom PRO helps you improve the safety and efficiency of your driving behaviour. It also helps you to save money and drive in a more environmentally responsible way.

When the LINK is installed in your vehicle, your PRO can collect information about driving events such as harsh braking, fast cornering, the time your vehicle is idling and fuel consumption\*.

While you are driving you are informed about driving events in the Driving View. Detailed information about safety and efficiency is shown on the ecoStatistics page:

1. Tap the Driving View to bring up the Main Menu.
2. Tap **WORK**.
3. Tap **ecoStatistics**.
4. Select the tab **Last trip**, **Today** or **Total**.

To reset the values of the active tab to 0 tap **Reset**.

The **ecoStatistics** view shows you the following details per trip, per day or in total:

- The distance and time driven.
- The number of driving events and their average severity.
- The total fuel consumption and how it compares to a reference value.
- The time spent stationary with the engine running for longer than five minutes and the fuel you have used.

*\* Information about fuel consumption is only available if your vehicle is installed with an ecoPLUS. For more information about ecoPLUS go to <http://business.tomtom.com/ecoplus>*

## 10. Advanced Lane Guidance

### About lane guidance

**Note:** Lane guidance is not available for all junctions or in all countries.

Your TomTom PRO helps you prepare for motorway exits and junctions by showing the correct driving lane for your planned route.

As you approach an exit or junction, the lane you need is shown on the screen.

### Using lane guidance

There are two types of lane guidance:

- Lane images

To turn lane images off, tap **Settings** in the Main Menu, then tap **Advanced settings**. Clear the checkbox for **Show lane images**.

---

**Tip:** Tap anywhere on the screen to return to the Driving View.

---

- Instructions in the status bar

---

**Tip:** If no lane guidance is shown in the status bar and all lanes are highlighted, you can use any lane.

---

## 11. WORK menu

To open the WORK menu, tap the screen to bring up the main menu, then tap **WORK**.

- **Show orders** - tap this button to view the list of orders.
- **Show messages** - tap this button to view the list of messages.
- **Send message** - tap this button to send text or general status messages to the office.
- **Report work time** - tap this button to report when you start and finish work, and start and finish breaks. This feature is only available if activated.
- **Change logbook mode** - tap this button to switch between private and business trips. This feature is only available if activated.
- **Change driver** - tap this button to change the driver.
- **ecoStatistics** - tap this button to view detailed information about the safety and efficiency of your driving style per trip, per day or in total.
- **Set odometer** - tap this button to adjust the odometer to match your vehicle's odometer.
- **Connection status** - tap this button to view the connection status between you and the office.
- **Change vehicle** - tap this button to change the vehicle in which you are using your PRO.
- **Settings** - tap this button to configure the source for the GPS signal, change the message settings and select warning sounds.

## 12. Orders

The office can send service orders, delivery orders and pick up orders. They are stored on your TomTom PRO.

You can read and deal with them at any time by tapping **Show orders** in the **WORK** menu.

To recall the order you are working on, tap **Active order** in the **Quick menu** or the order icon in the driving view.

These symbols show the type and status of items in your list of orders:

-  New service order
-  Service order in progress
-  Suspended service order
-  Finished service order
-  Cancelled or rejected service order
-  New delivery or pick up orders

### Working on orders

-  Tap the button for a new order in the driving view to bring up the latest unread order.

To show the complete list of your orders, do the following:

1. Tap the screen to bring up the main menu.

2. Tap **WORK**.
3. Tap **Show orders**.
4. Select an order from the list. To let the PRO device read aloud the order tap **Options**, then tap **Read aloud order**.
5. To work on this order tap **I agree**. To reject the order tap **Options**, then tap **Reject order**. You can enter a reason for the rejection.

If you have agreed to work on the order, you are asked to start the order. If the order contains destination data, you are asked to start navigation.

As soon as you start the order, you can report your current activity. To open the order you are currently working on, tap the quick menu button in the driving view, then tap **Active order**, or tap the order icon in the driving view. The order view shows you the current and the next step, and an excerpt of the order details.

To report the next activity, tap **Start next step**.

To read the complete order, including the planned arrival time and destination, tap **Details**.

To report to your office by sending a message, repeat the previous step or view the history of the current order, tap **Options**.

## Suspend and change orders

1. To suspend the current order, select it from the list of orders.
2. Tap **Options**.

3. Tap **Suspend**.

### Switch to another order

1. To switch to another order, select the order from the list of orders.
2. You are asked to suspend the current order and to start working on the new one.

You can continue working on the suspended order at any time. To do this, select the suspended order from the list and tap **Resume**.

### Cancel orders

1. If you want to cancel an order, first select the order from the list of orders and messages.
2. Tap **Options**.
3. Tap **Cancel**.

You have to enter a reason for cancelling the order.

## 13. Predefined routes over the air

To learn how to work with orders in general, see **Orders** (30).

### About predefined routes

In addition to orders with a single destination you can also receive Itinerary orders which include a predefined route with multiple waypoints on your TomTom PRO device. This chapter explains how to skip waypoints of an Itinerary order.

After you tap **Yes** to start the navigation of an Itinerary order, the Route Summary shows you the route on the map. It shows the destination, the total travel time, the total distance to travel and the number of waypoints on your itinerary.

Tap **Done** to start navigation. There is a waypoint icon in the Driving View that indicates the first waypoint in the list of waypoints on your Itinerary.

When you pass a waypoint, the waypoint icon in the Driving View flashes and you hear an audible notification. To disable these warnings, see **Changing notification settings when passing waypoints** (36).

After you have passed a waypoint the number of the next waypoint is shown in the Driving View.

**Note:** The Driving View shows the estimated time of arrival at the final destination and not at the next waypoint.

## Skiping waypoints in the list

You can access the list of waypoints of your itinerary order and skip single waypoints.

To navigate using a specific waypoint do the following:

1. Tap the Waypoint icon in the Driving View to show the list of waypoints and the departure and destination points.

2. Select a waypoint from the list.
3. Confirm you want to navigate to the selected waypoint.
4. Tap **Yes**.

The next waypoint is shown with a blue number on the map.

5. Tap **Done**.

The waypoints you have passed through or skipped are greyed-out and stay in the list for reference or later use. You can select greyed-out waypoints from the list as next destination at any time. When you select a greyed-out waypoint, all the waypoints that follow in the list become active again and are included in the itinerary.

## Skiping waypoints using the map

If you prefer to select a waypoint on the map as the next destination, do the following:

1. Tap the waypoint icon in the Driving View to show the list of waypoints.
2. Tap **Map** to show the route and the waypoints on the map.

3. Tap the map to select a waypoint.

The location you tapped on the map is flagged.

**Tip:** This location does not have to be exactly on one of the waypoints already on your itinerary.

4. Tap the button in the street name balloon.
5. Tap **Navigate to nearest waypoint** to navigate to the waypoint in the list which is nearest to the selected location.

6. Confirm that you want to navigate to the waypoint shown.
7. Tap **Yes** to confirm the nearest waypoint.

The next waypoint is shown with a blue number on the map.

8. Tap **Done**.

Navigation to the selected waypoint begins.

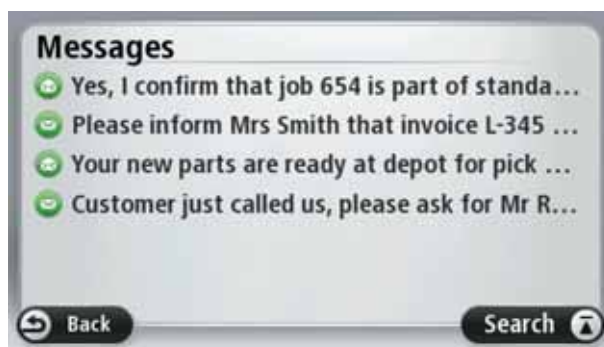

### Changing notification settings when passing waypoints

If you want to switch notifications when passing waypoints on or off, do the following:

1. Tap the screen to bring up the Main Menu.
2. Tap **WORK**.
3. Tap **Settings**.
4. Tap **Message settings**.
5. Select or clear the checkbox for the setting **Notify when passing waypoints**.
6. Tap **Done**.

## 14. Messages

The office can send text messages to you. They are stored on your TomTom PRO. You can read them at any time by tapping **Show messages** in the **WORK** menu.

These symbols show the type and status of items in your messages list and in your list of orders:

New text message

Text message that has been read

### Dealing with messages

Tap the button for new messages in the driving view to show the latest message.

To show the complete list of your messages, do the following:

1. Tap the screen to bring up the main menu.
2. Tap **WORK**.
3. Tap **Show messages**.
4. Select a message from the list. To let the PRO device read aloud the order tap **Options**, then tap **Read aloud order**.
5. To reply to this message, tap **Options** and then **Reply to message**.

**WORK message**

**Yes, I confirm that job 654 is part of standard contract agreement, no payment needed on-site.**

**Back**

**Options**

**Delete**

## 15. Call contact

Orders can contain a contact name and a telephone number. You can call this number from your TomTom PRO.

**Note:** To use the **Call contact** feature you need a Bluetooth® mobile phone that is compatible with your PRO device.

1. Tap the screen to bring up the main menu.
2. Tap **WORK**.
3. Tap **Show orders**.
4. Select an order from the list by tapping it.
5. Tap **Options**.

6. Tap **Call**.

7. Tap the contact to dial the number.

## 16. Report to office

---

### Send text message

To send a text message to the office, do the following.

1. Tap **Send message** in the **WORK** menu.
2. Tap **Write new text message**.

3. Enter your text (see below).

4. To send your complete message to the office, tap **OK**.

Enter your message using the keyboard and the following buttons:

-  Tap this button to enter upper-case letters.
-  Tap this button to switch to the numeric keyboard.
-  Tap this button to switch to the special characters keyboard.
-  Tap this button to switch to the umlauts keyboard.

Tap this button to switch back to the alphabetic keyboard.

Tap this button to delete single characters.

## Send a pre-defined message

Pre-defined messages must be defined by the office. You can also add information to a predefined message.

1. Tap **Send message** in the **WORK** menu.
2. Select a pre-defined message from the list by tapping it.

3. Tap **Send** to send the message directly to the office. If you want to add information, tap **Edit** then send your message.

## 17. Driver identification

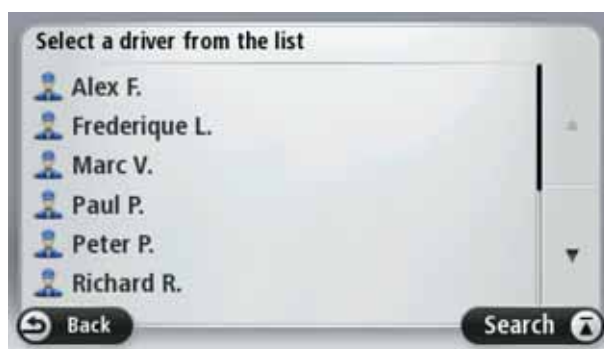

To generate personalised work time reports, you need to identify yourself by entering your PIN code.

**Note:** Using TomTom WEBFLEET, the office can select that you have to enter your PIN code each time you switch on your TomTom PRO.

1. Tap the screen to bring up the main menu.
2. Tap **WORK**.
3. Tap **Change Driver**.

4. Select your name from the driver list by tapping it.

5. Enter your four digit PIN code provided by your WEBFLEET administrator, then tap **OK**.

Your PIN code is now stored and used for all reports until you change it.

## 18. Report working time

You can report the time that you start and finish work, as well as the time you spend having breaks.

To do this, you must first set your driver name (see **Driver identification** (43)).

### Report working time

To report the times you spend working to TomTom WEBFLEET, do the following:

1. Tap the screen to bring up the main menu.
2. Tap **WORK**.
3. Tap **Report work time**.

4. Tap the appropriate button to change your work status.

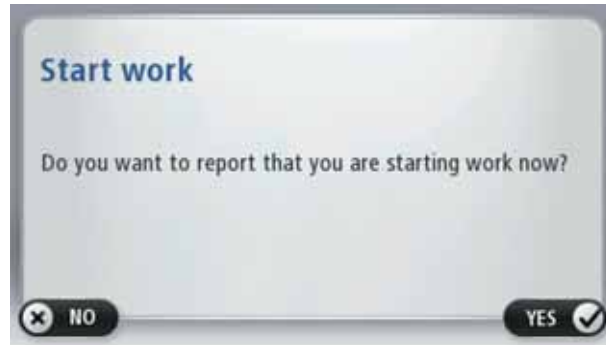

You can select between **Start**, **Pause** and **End**. When you tap **Start**, the time you started working is indicated. To report the start of a break tap **Pause**. To resume work after a break, tap **Start** again. To report the end of your work tap **End**.

**Note:** Either **Report work time** or **Change logbook mode** is available. These are activated by the office using TomTom WEBFLEET.

## Turning on/off the navigation device

When you turn on your TomTom PRO device, you may be asked to report that you are starting work or finishing a break. This happens if the last status you reported before switching off was **End** or **Pause**.

When you turn off your TomTom PRO device and you have not reported **End** or **Pause**, your device displays a menu with the options **End**, **Pause** and **Start**. You can then report your status to WEBFLEET before turning off.

**Note:** The feature that asks you to **Report work time** transactions is activated by the office using TomTom WEBFLEET.

## 19. Change logbook mode

You can generate a driver's logbook with your TomTom PRO. To use this functionality you need to adjust the odometer first. You can do this by tapping **Adjust** in the logbook. See **Adjust odometer** (62).

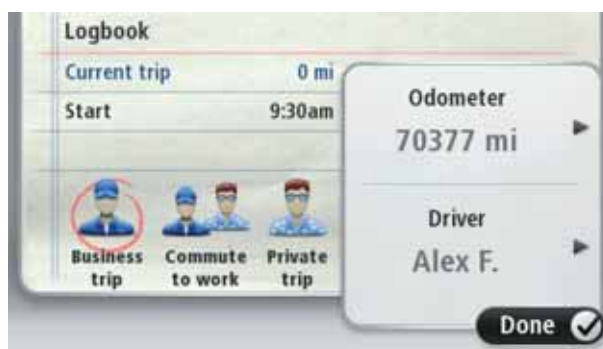

To change the logbook mode or type of trip, do the following:

1. Tap the screen to bring up the main menu.
2. Tap **WORK**.
3. Tap **Change logbook mode**.

**Note:** Either **Report work time** or **Change logbook mode** is available. These are activated by the office using TomTom WEBFLEET.

4. Select the appropriate logbook mode.

The current logbook mode is shown with a red circle around it, as well as journey specific information.

## 20. Making changes to your route

---

### About route changes

After you plan a route, you may want to change the route or even the destination. There are various ways to change your route without the need to completely replan the entire journey.

To change the current route, tap **Change route** in the Main menu:

**Change route**

Tap this button to change the current route.

This button is only shown while there is a planned route on your PRO.

---

### Change route menu

To change the current route or your destination, tap one of the following buttons:

**Calculate alternative**

Tap this button to find an alternative to the current route.

This button is only shown while there is a planned route on your PRO.

This is a simple way to search for a different route to your current destination.

Your PRO calculates a new route from your current location, to reach your destination using completely different roads.

The new route is shown next to the original route so that you can select the route you want to use.

**Avoid roadblock**

Tap this button while driving on a planned route, to avoid a roadblock or traffic congestion on the road ahead.

Your PRO will suggest a new route which avoids the roads on your current route for the selected distance.

If the roadblock or traffic congestion suddenly clears, tap **Recalculate route** to replan your original route.

---

**Important:** Be aware that when a new route is calculated, you might immediately be asked to turn off the current road.

---

Tap this button to avoid traffic delays on a planned route.

It is not always possible to avoid all traffic delays. Your PRO will check for traffic delays on your route and calculate the best route to avoid all or most of the delays.

***Note:** This button is only available when Traffic is enabled in the Services menu. For more information about TomTom traffic information services, go to [tomtom.com/services](http://tomtom.com/services).*

Tap this button to change the current destination.

When you change the destination, you are shown the same options and asked to enter the new address in the same way as when you plan a new route.

Tap this button to avoid part of the current route.

You are shown a list of the streetnames on your route. When you tap one of the streetnames, your PRO calculates a detour to avoid the selected street. The route summary shows both the new route and your original route. Tap the panel on the right to select one of the routes and then tap **Done**.

If you do not want to use either of the routes shown in the route summary, tap **Change route** to find another way to alter your route.

Tap this button to change your route by selecting a location you want to travel past, maybe so you can meet someone on the way.

When you select a location to travel past, you are shown the same options and asked to enter the new address in the same way as when you plan a new route.

Your PRO calculates the route to your destination via the selected location.

The selected location is shown on the map using a marker. You can only select one location to travel past on a route.

Unlike the warning which is given when you reach your destination, no warning is given when you travel past a marked location.

---

## 21. View map

### About viewing the map

You can view the map in the same way as you might look at a traditional paper map. The map shows your current location and many other locations such as Favourites and POIs.

To view the map in this way, tap **View map** or **View route** in the Main menu.

You view different locations on the map by moving the map across the screen. To move the map, touch the screen and drag your finger across the screen.

To select a location on the map, tap the location on the map. The cursor highlights the location and displays useful information about the location in an information panel. Tap the information panel to create a Favourite or plan a route to that location.

### View map

1. The scale bar
2. Traffic - current traffic incidents. Use the Options button to select whether traffic information is shown on the map. When traffic information is shown on the map, POIs and Favourites are not shown.

**Note:** *LIVE services are only available in designated countries. In order to benefit from LIVE services, the respective WEBFLEET subscription is needed. For more information on available services in your country, go to [business.tomtom.com/liveservices](http://business.tomtom.com/liveservices).*

3. Marker

Markers point to your current location (blue), your home location (yellow) and your destination (red). The marker shows the distance to the location.

Tap a marker to centre the map on the location pointed to by the marker.

You can also set your own marker. Tap the cursor button, then tap **Set marker position** to place a green marker at the cursor position.

To turn markers off, tap **Options**, then **Advanced** and clear the **Markers** checkbox.

4. Options button

5. The cursor with streetname balloon.

Tap the button in the streetname balloon to open the cursor menu. You can navigate to the cursor position, make a Favourite of the cursor position, or find a Point of Interest near the cursor position.

6. The Find button

Tap this button to find specific addresses, favourites or Points of Interest.

7. The zoom bar

Zoom in and out by moving the slider.

## Options

Tap the **Options** button to set the information shown on the map and show the following information:

- **Traffic** - select this option to show traffic information on the map. When traffic information is shown, POIs and Favourites are not shown.

***Note:** LIVE services are only available in designated countries. In order to benefit from LIVE services, the respective WEBFLEET subscription is needed. For more information on available services in your country, go to [business.tomtom.com/liveservices](http://business.tomtom.com/liveservices).*

- **Names** - select this option to show street and city names on the map.
- **Points of interest** - select this option to show POIs on the map. Tap **Choose POI** to choose which POI categories are shown on the map.
- **Favourites** - select this option to show your Favourites on the map.

Tap **Advanced** to show or hide the following information:

- **Markers** - select this option to enable markers. Markers point to your current location (blue), your home location (yellow) and your destination (red). The marker shows the distance to the location.

Tap a marker to centre the map on the location which the marker is pointing to.

To create your own marker, tap the cursor button. Then tap **Set marker position** to place a green marker at the cursor position.

To disable markers, tap **Options**, then tap **Advanced** and unselect **Markers**.

- **Coordinates** - select this option to show GPS coordinates in the lower left corner of the map.

## Cursor menu

The cursor can be used to do more than highlight a location on the map.

Position the cursor on a location on the map, then tap **Cursor** and then tap one of the following buttons:

**Navigate there**

Tap this button to plan a route to the cursor position on the map.

---

**View location**

Tap this button to view information about the location on the map such as the address.

**Set marker position**

Tap this button to create your own green marker and place it at the cursor position.

If a green marker exists, this button changes to **Delete marker**.

**Find POI nearby**

Tap this button to find a POI near the cursor position on the map.

For example, if the cursor currently highlights a restaurant location on the map, you can search for a nearby parking garage.

**Correct location**

Tap this button to make a map correction for the cursor position on the map.

You can make the correction only on your own map or you can share the correction with the TomTom Map Share community.

**Call...**

Tap this button to call the location at the cursor position.

This button is only available if your PRO has the phone number for the location.

The phone numbers for many POIs are available on your PRO.

You can also call phone numbers of your own POIs.

**Add as Favourite**

Tap this button to create a Favourite at the cursor position on the map.

**Add as POI**

Tap this button to create a POI at the cursor position on the map.

**Travel via...**

Tap this button to travel via the cursor position on the map as part of your current route. Your destination remains the same as before, but your route now includes this location.

This button is only available while there is a planned route.

**Centre on map**

Tap this button to centre the map on the cursor position.

---

## 22. Map corrections with TomTom Map Share™

---

### About TomTom Map Share

TomTom Map Share helps you correct map errors and share map corrections with the rest of the TomTom Map Share community.

To correct your map and share map corrections with other Map Share users, tap **Map corrections** in the Services menu.

Map Share allows you to send and receive map corrections for one year after the new version of a map is released.

This means that one year after the release date, you can still correct your own map but you cannot send or receive map corrections until you upgrade your map to the latest version.

**Note:** *TomTom Map Share is not available in all regions. For more information, go to [tomtom.com/mapshare](http://tomtom.com/mapshare).*

### TomTom Map Share community

To join the Map Share community, do the following:

1. Tap **Map corrections** in the Services menu.
2. Tap **Corrections from others**.
3. Read the description, then tap **Join**.
4. Read the description, then tap **Continue**.
5. Select the category of Map Share corrections you want to use for your maps.
6. Tap **Done**.

When you connect your PRO to your computer, MyTomTom downloads any new corrections and sends your corrections to the Map Share community.

### Map corrections

Map corrections are reported by Map Share users and verified by TomTom.

- Corrections that are reported by Map Share community members include:

Changes to the traffic flow in a street, blocking or renaming a street and adding, removing or editing POIs.

These corrections are immediately shared with the Map Share community.

- Corrections that are reported by Map Share members and verified by TomTom include:

Missing streets, errors in motorway entrances and exits and missing roundabouts.

These corrections are investigated and verified by TomTom and are included when the next map version is released.

## Map correction settings

You can decide which map corrections from the Map Share community are used to correct your maps. To select a category, tap **Map corrections settings** in the Map corrections menu.

There are three categories of map corrections:

- **Corrections verified by TomTom** - this category only includes corrections investigated by TomTom.
- **Corrections verified by TomTom or confirmed by many members** - this category includes corrections investigated by TomTom and corrections reported by a high number of Map Share community members.
- **All reported map corrections** - this category includes corrections investigated by TomTom and corrections reported by a high number of Map Share community members and corrections reported by only a few Map Share community members.

## Downloading and sending map corrections

To download the latest new map corrections and to send your own corrections, connect your TomTom PRO to MyTomTom.

If new map corrections are available for your maps, then your PRO will automatically download the corrections and update your maps.

You can select the type of corrections you want to download, in the Map corrections settings menu on your PRO.

## Reporting a map error

If you find an error on your map, you can mark the location using the report button in the Driving view. You can then correct the error and send the correction when you have completed your journey.

For example, you are driving to a friend's house and you notice that the name of a street on your map is different from the name on the street sign. To mark the location for later correction, tap the report button and your PRO will record the location.

---

**Important:** For safety reasons, do not enter the full details of a map correction while you are driving. Mark the location of the map error instead and enter the full details later.

---

To show the report button in the Driving view, do the following:

1. Tap **Map corrections** in the services menu.
2. Tap **Map correction settings**.
3. Select the type of corrections you want to download. Then tap **Done**.
4. Read the instructions on the screen. Then tap **Continue**.
5. Select how you want to share your map corrections. Then tap **Next**.
6. Select **Show report button**. Then tap **Done**.

The report button is shown on the left-hand side of the Driving view.

### Correcting a map error

**Correct a map error**

---

**Important:** For safety reasons, do not enter the full details of a map correction while you are driving. Mark the location of the map error instead and enter the full details later.

---

To correct a map error, do the following:

1. Tap **Map corrections** in the services menu.
2. Tap **Correct a map error**.
3. Select the type of map correction you want to report.
4. Select how you want to select the location.
5. Select the location. Then tap **Done**.
6. Enter the details of the correction. Then tap **Done**.
7. Tap **Send**.

The correction is saved and the information is sent to Map Share.

### Types of map correction

To make a correction to your map, tap **Map corrections** in the services menu, then tap **Correct a map error**. There are several types of map correction available.

Tap this button to block or unblock a street. You can block or unblock the street in one or both directions.

For example, to correct a street near to your current location, do the following:

1. Tap **(Un)block street**.
2. Tap **Near you** to select a street near your current location. You can select a street by name, a street near your Home location or a street on the map.
3. Select the street or section of a street you want to correct by tapping it on the map.

The street you select is highlighted and the cursor shows the name of the street.

4. Tap **Done**.

Your device shows the street and whether the traffic is blocked or allowed in each direction.

5. Tap one of the direction buttons to block or unblock the flow of traffic in that direction.
6. Tap **Done**.

The next time you connect your device to MyTomTom, your corrections are shared with the TomTom Map Share community.

Tap this button to correct the traffic direction of a one-way street, where the direction of traffic is different to the direction shown on your map.

**Note:** Reverse traffic direction only works for one-way streets. If you select a two-way street you will be given the chance to block/unblock the street rather than changing the direction.

**Edit street name**

Tap this button to change the name of a street on your map.

For example, to rename a street near to your current location:

1. Tap **Edit street name**.
2. Tap **Near you**.
3. Select the street or section of a street you want to correct by tapping it on the map.

The street you select is highlighted and the cursor shows the name of the street.

4. Tap **Done**.
5. Type the correct street name.
6. Tap **Done**.

**Change turn restrictions**

Tap this button to change and report incorrect road turn restrictions.

**Change road speed**

Tap this button to change and report the road speed limit.

**Add or remove roundabout**

Tap this button to add or remove a roundabout.

**Add missing POI**

Tap this button to add a new Point of Interest (POI).

For example to add a new restaurant near to your current location:

1. Tap **Add missing POI**.
2. Tap **Restaurant** in the list of POI categories.
3. Tap **Near you**.
4. Select the location of the missing restaurant.

You can select the location by entering the address or by selecting the location on the map. Select **Near you** or **Near home** to open the map at your current location or at your Home location.

5. Tap **Done**.
6. Type the name of the restaurant then tap **OK**.
7. If you know the telephone number of the restaurant you can type it, then tap **OK**.

If you don't know the number, just tap **OK** without typing a number.

#### Edit POI

Tap this button to edit an existing POI.

You can use this button to make the following changes to a POI:

- Delete the POI.
- Rename the POI.
- Change the telephone number of the POI.
- Change the category that a POI belongs to.
- Move the POI on the map.

#### Comment on POI

Tap this button to enter a comment about a POI. Use this button if you cannot edit the error with the POI using the **Edit POI** button.

#### Correct house number

Tap this button to correct the location of a house number. Enter the address that you wish to correct and then indicate on the map the correct location of that house number.

#### Existing street

Tap this button to edit an existing street. Once you have selected the street, you can select an error to report. You can select more than one type of error for a street.

#### Missing street

Tap this button to report a missing street. You have to select the start and end points of the missing street.

#### City

Tap this button to report an error about a city. You can report the following types of error:

- City is missing
- Wrong city name
- Alternative city name
- Other

#### Motorway entrance/exit

Tap this button to report an error about a motorway entrance or exit.

#### Postcode

Tap this button to report an error about a postcode.

#### Other

Tap this button to report other types of corrections.

These corrections are not immediately applied to your map. Your TomTom PRO sends a special report to TomTom Map Share.

You can report missing streets, errors in motorway entrances and exits and missing roundabouts. If the correction you want to report is not covered by any of these report types, enter a general description then tap Other.

---

## 23. Sounds and voices

---

### About sounds and voices

Your TomTom PRO uses sound for the following:

- Driving directions and other route instructions
- Traffic information
- Warnings that you set
- Hands-free phone calls

There are two types of voice available for your PRO:

- Computer voices

Computer voices are generated by your PRO. They provide route instructions and read aloud city and street names, traffic and weather reports, user messages and tutorials.

- Human voices

These are recorded by an actor and only provide route instructions.

### About computer voices

Your TomTom PRO uses text-to-speech technology and computer voices to read the street names on your map as it guides you on your route.

The computer voice analyses the whole phrase or sentence before speaking, to ensure that the sentence sounds as close as possible to natural speech.

Computer voices can recognise and pronounce foreign towns and street names. For example, the English computer voice can read and pronounce French street names.

---

**Important:** Computer voices are not available in all languages.

If you require a computer voice and your language is unavailable, then you need to install and use the English language computer voice. For more information on computer voices, go to **[tomtom.com/services](http://tomtom.com/services)**.

---

### Selecting a voice

To select a different voice on your TomTom PRO, tap **Voices** in the settings menu. Then tap **Change voice** and select the required voice.

### Changing the volume level

You can change the volume on your TomTom PRO in several ways.

- In the Driving view.

Tap the central panel on the status bar and move the slider to adjust the volume. The last route instruction is played so you can hear the new volume level.

- In the Settings menu.

Tap **Settings** in the Main menu, then tap **Volume settings** and move the slider to adjust the volume. Tap **Test** to listen to the new volume level.

### **Automatic volume control**

To set your TomTom PRO to automatically adjust the volume, do the following:

1. Tap **Settings** in the Main menu.
2. Tap **Volume settings**.
3. Select **Link volume to noise level** to automatically adjust the volume inside the car in response to engine noise.
4. Tap **Done**.

## 24. WORK settings

---

In the **WORK** menu, there is a **Settings** menu.

Use the **Settings** menu to do the following:

- If you are using your PRO together with a LINK, choose to use the GPS signal either from your TomTom navigation device or from your LINK.

---

**Important:** Make sure the GPS source you select has a clear view of the sky. This is needed for good GPS reception.

---

- Select to read aloud incoming orders and WEBFLEET messages automatically.
- Select a warning sound for dangerous driving and for idling.

## 25. Adjust odometer

---

When you use the logbook you need to synchronise the odometer on your TomTom PRO with your vehicle's odometer.

1. Tap the screen to bring up the main menu.
2. Tap **WORK**.
3. Tap **Set odometer**.
4. Tap the buttons to adjust the odometer to match your vehicle's odometer.

5. Tap **Done** to save the changes.

## 26. Change vehicle

*The following information applies when your TomTom PRO 7xxx is connected to a TomTom LINK.*

When you change the vehicle you need to connect your PRO to the LINK installed in the new vehicle.

---

**Important:** The list of orders and messages, all reporting information, and all messages are deleted when you change vehicle.

---

1. Tap the screen to bring up the main menu.
2. Tap **WORK**.
3. Tap **Change vehicle**.

4. Select the LINK you want to connect your PRO device to from the list of Bluetooth devices.

Enter the activation code from your WEBFLEET contract confirmation and the licence plate number and choose the applicable vehicle type (see **Connecting to LINK and WEBFLEET (7)**).

## 27. Connection status

---

To see the connection status of your PRO, your LINK and WEBFLEET, do the following:

1. Tap the screen to bring up the main menu.
2. Tap **WORK**.
3. Tap **Connection status**.

Here you have a brief overview of the connection status:

- GSM connection
- GPRS connection
- Connection to TomTom WEBFLEET
- If Bluetooth is disabled and how to enable it.
- If the LINK is disconnected and how to initiate the reconnection.
- If an ecoPLUS is connected to the LINK.
- The progress of the calibration of the LINK to record driving events.
- If the LINK has not been activated and how to activate it.

**Note:** To activate your LINK you need the activation code found in the contract confirmation letter.

## 28. Considerations

---

This section contains important considerations for the use of your TomTom PRO together with the TomTom LINK and/or TomTom WEBFLEET.

### Maintain connection to LINK

*The following applies when you are using a TomTom PRO 7xxx connected to a TomTom LINK.*

If you are using your PRO together with a LINK, these devices must be connected to fully benefit from the additional WORKsmart™ functionality.

Messages you send to the office are only sent when your PRO and the LINK are connected. When there is no connection between the two devices, the messages are stored on your PRO.

This means, for example, that if you change the logbook mode from **Private trip** to **Business trip** while the two devices are disconnected, the logbook records the time you change the trip as the time when you connect the devices.

### Maintain connection to WEBFLEET

*The following applies when you are using a TomTom PRO 9xxx connected to TomTom WEBFLEET.*

If you are using your PRO device connected to WEBFLEET, the PRO device must maintain connection to the WEBFLEET service to fully benefit from the additional WORKsmart™ functionality.

Messages are only sent to your office if your PRO is connected to WEBFLEET. When there is no connection, the messages are stored on your PRO device.

### Configuration from the office

Status message configuration and the selection between **Change logbook mode** and **Report work time** can only be made by the office.

## 29. Settings

---

### About settings

You can change the way your TomTom PRO looks and behaves. Most of the settings on your device can be accessed by tapping **Settings** in the Main Menu.

### Use night colours / Use day colours

**Use night colours**

Tap this button to reduce the brightness of the screen and display the map in darker colours.

When driving at night or when driving through a dark tunnel, it is easier to view the screen and less distracting for the driver, if the brightness of the screen is dimmed.

**Use day colours**

Tap this button to increase the brightness of the screen and display the map in brighter colours.

### Turn off voice guidance / Turn on voice guidance

**Turn off Voice guidance**

Tap this button to switch off voice guidance. You will no longer hear spoken route instructions, but you will still hear information such as, traffic information and warnings.

Voice guidance is also switched off if you tap **Turn off sound** in the Settings menu.

***Note:** If you change the voice on your PRO, then voice guidance is automatically switched on for the new voice.*

**Turn on Voice guidance**

Tap this button to switch on voice guidance and hear spoken route instructions.

### Phone settings

**Phone settings**

Tap this button to open the phone settings menu.

For more information on connecting your phone and making hands-free calls, see **Hands-Free calling**.

## Help

Tap **Help** to navigate to emergency services centres and other specialist services and contact them by phone.

For more information, see **Help**.

## Home and Favourites

Tap this button to manage your favourites or change your home location as described below.

## Manage Favourites

Tap this button to add, rename or delete Favourites.

Favourites provide an easy way to select a location without the need to enter the address. They do not need to be favourite places, they can simply be seen as a collection of useful addresses.

To create a new Favourite, tap **Add**. Then enter the location address in the same way that you enter an address when you plan a route.

To view or change an existing Favourite, tap one of the items in the list. To see more Favourites on the map, tap the left or right buttons.

## Change Home location

### Change Home location

Tap this button to set or change your Home location. You enter the address in the same way as you do when you plan a route.

Your Home location provides an easy way to plan a route to an important location.

For most people, your Home location will be your home address. However, you might prefer to set the location to another regular destination, such as your workplace.

## Make your own menu

### Make your own menu

Tap this button to add up to six buttons to your own personalised menu.

If there are only one or two buttons in your menu, both buttons are shown in the Driving view.

If you have three or more buttons in your menu, then a single button is shown in the Driving view which opens your menu when tapped.

## Voices

### Change voice

Tap this button to change the voice that gives spoken directions and other route instructions.

A wide range of voices are available. There are computer voices which can read street names and other information directly from the map and there are human voices which have been recorded by actors.

### Voice settings

Tap this button to set the type of spoken directions and other route instructions your TomTom PRO will read aloud.

## Volume settings

### Volume settings

Tap this button to set the volume level for your TomTom PRO. Move the slider to change the volume.

## Speaker settings

### Speaker settings

Tap this button to select the loudspeaker or loudspeaker connections that are used on your TomTom PRO.

## Start-up settings

**Start-up  
settings**

Tap this button to set what happens when your TomTom PRO starts.

## Set clock

**Set clock**

Tap this button to select the time format. As soon as you have a GPS fix, the time will be set automatically. If you don't have a GPS fix, you can choose to set the time manually.

## Edit vehicle profile

**Edit vehicle  
profile**

Tap this button to edit your vehicle profile. A vehicle profile is a collection of information about the vehicle you are driving or planning a route for.

---

**Important:** Truck-specific features are only supported when using a truck map.

---

## Manage POIs

Manage POIs

Tap this button to manage your own POI categories and locations.

---

**Tip:** To report incorrect or missing information about an existing Point of Interest included with your map, use the Map Share service to share your corrections with the Map Share community.

---

You can set your PRO to let you know when you are near to selected POI locations. In this way, you could for example, set the device to let you know when you are approaching a petrol station.

You can create your own POI categories and add your own POI locations to these categories.

You can for example, create a new POI category called, Friends. You could then add all your friend's addresses as POIs in this new category. If you add their phone numbers, you can call them on your mobile phone using the hands-free calling feature on your PRO.

Tap the following buttons to create and maintain your own POIs.

- **Add POI** - tap this button to add a location to one of your own POI categories.
- **Warn when near POI** - tap this button to set your PRO to warn you when you are near selected POIs.
- **Delete POI** - tap this button to delete one of your own POI categories.
- **Edit POI** - tap this button to edit one of your own POIs.
- **Add POI category** - tap this button to create a new POI category.
- **Delete POI category** - tap this button to delete one of your own POI categories.

## Show POI on map

Show POI on map

Tap this button to select the types of Point of Interest (POI) you want to see on the map.

1. Tap **Show POI on map** in the Settings menu.
2. Select the POI categories you want to be shown on the map.  
  
Tap **Search** and use the keyboard to search for a category name.
3. Select whether you want POIs to be shown in 2D or 3D views of the map.
4. Tap **Done**.

Point of Interest locations are shown on the map as symbols.

## Switch map

**Switch map**

Tap this button to select the map you want to use for route planning and navigation.

Although you can store more than one map on the device, you can only use one map at a time for planning and navigation.

To switch from the current map to plan a route in another country or region, simply change this setting.

**Note:** When you first select a new map, you may need to connect to your MyTomTom account and activate the map.

## Planning settings

**Planning settings**

Tap this button to set the way your TomTom PRO calculates the routes that you plan.

Set the type of route you want your PRO to calculate.

Tap **IQ Routes** to set if you want the device to use IQ Routes information to help find the best route.

Set whether you want your TomTom PRO to replan the current route if a faster route is found while you are driving. This is useful if traffic builds up or clears, further ahead on your route.

Set whether you want to be warned if your route passes through an area where your map contains only limited information.

Set how your PRO should manage toll roads and ferry crossings when the device calculates a route.

Set whether you want the route summary screen to close automatically after you plan a route. If you select **No**, then you will need to tap **Done** to close the route summary screen every time you plan a route.

## Safety settings

**Safety settings**

Tap this button to select the safety features you want to use on your TomTom PRO.

## Change car symbol

**Change car symbol**

Tap this button to select the car symbol that shows your current location in the Driving view.

## 2D/3D settings

### 2D/3D settings

Tap this button to set the default view of the map. To switch between 2D and 3D views while driving, tap the centre part of the status bar in Driving View.

It is sometimes easier to view the map from above, such as when navigating a complex road network.

The 2D view shows a two dimensional view of the map as though viewed from above.

The 3D view shows a three dimensional view of the map as though you are driving through the landscape.

The following buttons are available:

- **In 2D view: rotate map in direction of travel** - tap this button so the map is rotated automatically with the direction you are travelling always at the top.
- **Switch to 3D view when following a route** - tap this button to show the map automatically in 3D view when you are following a route.

## Status bar settings

### Status bar settings

Tap this button to select the information you want to see on the status bar.

- **Horizontal** - show the status bar at the bottom of the Driving view.
- **Vertical** - show the status bar on the right-hand side of the Driving view.
- **Maximum speed**

---

**Important:** The speed limit is shown next to your current speed and your speed is shown in red, if you drive faster than the speed limit.

Information about speed limits is not available for all roads.

---

- **Current time**
- **Remaining distance** - the distance to your destination.
- **Leeway** - your PRO shows how late or early you will arrive, compared with your preferred arrival time that was set when you planned the route.

## Change map colours

### Change map colours

Tap this button to select the colour schemes for day and night map colours.

Tap **Search** to search for a colour scheme by typing the name.

To download more colour schemes, go to **tomtom.com**.

## Brightness settings

**Brightness settings**

Tap this button to set the brightness of the screen. Move the sliders to adjust the brightness level.

To view the map and menus in day or night colours, tap **Use night colours** or **Use day colours** in the Settings menu.

## Keyboard settings

**Keyboard settings**

Tap this button to select the keyboards that should be available and the layout of the Latin keyboard.

You use the keyboard to enter names and addresses, such as when you plan a route or search for the name of a town or a local restaurant.

## Change language

**Change language**

Tap this button to change the language used for all the buttons and messages you see on your PRO.

You can choose from a wide range of languages. When you change the language, you are also given the opportunity to change the voice.

## Set units

**Set units**

Tap this button to set the units used on your PRO for features such as route planning and weather reports.

## Operate left-handed / Operate right handed

**Operate left-handed / Operate right-handed**

Tap this button to make it easier for right- or left-handed operation.

This will affect items such as the zoom bar when you are viewing the map.

## Battery saving settings

**Battery saving settings**

Tap this button to set the power saving features on your PRO.

## Status & Information

### Status & Information

Tap this button to find technical information on your TomTom PRO such as the device serial number, application version and the map version.

You can also view the current status for GPS reception.

## Advanced settings

### Advanced settings

Tap this button to select the following advanced settings:

- **Show house number before street name** - when this setting is selected, addresses are shown with the house number followed by the streetname, such as **10 Downing street**.
- **Show street names** - when this setting is selected, street names are shown on the map in the Driving View. You do not need to select this option when your PRO is set to read aloud street names using a computer voice.
- **Show next street name** - when this setting is selected, the name of the next street on your route is shown at the top of the Driving view.
- **Show current street name on map** - when this setting is selected, the name of the street you are on is shown at the bottom of the Driving view.
- **Show location preview** - when this setting is selected, a graphical preview of your destination is shown during route planning.
- **Enable automatic zooming in 2D view**
- **Enable automatic zooming in 3D view**
- **Show lane images** - when this setting is selected, a graphical view of the road ahead shows which lane you need when you approach a junction or motorway exit. This feature is not available for all roads.
- **Show tips**
- **Automatically adjust clock for time zone**

## Reset factory settings

Tap this button to delete all your personal settings and restore the standard factory settings to your TomTom PRO.

This is not a software update and will not affect the version of the software application installed on your PRO.

---

**Important:** This feature deletes all your personal settings!

If you want to keep your personal information and settings, you should **perform a full backup** of your PRO **before you reset the device**. You can then restore all your personal information and settings after you reset the device. This includes items such as your Home and Favourite locations, your personal menu and your POI categories and POI locations.

All messages and orders will be deleted.

You will also need to re-enter your WEBFLEET activation code in order to use the WORKsmart features, for example, messaging, order management, working time or logbook reporting. This information is NOT stored in a backup.

---

## 30. Points of Interest

---

### About Points of Interest

Points of Interest or POIs are useful places on the map.

Here are some examples:

- Restaurants
- Hotels
- Museums
- Parking garages
- Petrol stations

---

**Tip:** To report incorrect or missing information about an existing Point of Interest included with your map, use the Map Share service to share your corrections with the Map Share community.

---

### Creating POIs

---

**Tip:** You can download POI sets and share your own POI sets using MyTomTom.

---

1. Tap the screen to open the Main Menu.
2. Tap **Settings**.
3. Tap **Manage POIs**.
4. If there are no POI categories or the one you want to use does not exist, tap **Add POI category** and create a new category.

**Add POI category**

Every POI must be assigned to a POI category. This means you need to have created at least one POI category before you can create your first POI.

You can only add POIs to POI categories you have created.

For more information on creating POI categories, read **Managing POIs**.

5. Tap **Add POI**.
6. Select the POI category you want to use for the new POI.
7. Tap a button to enter the POI address in the same way that you plan a route.

 <b>Home</b>	<p>Tap this button to set your Home location as a POI.</p> <p>This is useful if you decide to change your Home location, but first want to create a POI using the current Home address.</p>
 <b>Favourite</b>	<p>Tap this button to create a POI from a Favourite.</p> <p>You might want to create a POI from a Favourite because you can only create a limited number of Favourites. If you want to create more Favourites you need to delete some Favourites. To avoid losing a Favourite, save the location as a POI before you delete the Favourite.</p>
 <b>Address</b>	<p>Tap this button to enter an address as a new POI.</p> <p>When you enter an address, you can choose from four options.</p> <ul style="list-style-type: none"> <li>• <b>City centre</b></li> <li>• <b>Street and house number</b></li> <li>• <b>Postcode</b></li> <li>• <b>Crossing or intersection</b></li> </ul>
 <b>Recent destination</b>	<p>Tap this button to select a POI location from a list of places you have recently used as destinations.</p>
 <b>Local search</b>	<p>Tap this button to use TomTom Local Search with TomTom Places to search for shops and businesses in and around your current location.</p> <p>You can choose to search for shops and businesses near you, near your destination, near any other destination or in a city.</p> <p>For example, if you are looking for a swimming pool near your current location, enter 'swimming pool' and choose the best search result.</p>
 <b>Point of Interest</b>	<p>Tap this button to add a Point of Interest (POI) as a POI.</p> <p>For example, if you are creating a category of POIs for your favourite restaurants, use this option instead of entering the addresses of the restaurants.</p>
 <b>My location</b>	<p>Tap this button to add your current location as a POI.</p> <p>For example, if you stop somewhere interesting, you can tap this button to create a new POI at the current location.</p>
 <b>Point on map</b>	<p>Tap this button to create a POI using the map browser.</p> <p>Use the cursor to select the location of the POI, then tap <b>Done</b>.</p>
 <b>Latitude Longitude</b>	<p>Tap this button to create a POI by entering latitude and longitude values.</p>

**Spoken address**

Tap this button to create a POI by saying the address.

**Position of last stop**

Tap this button to select the location where your PRO was last docked.

---

The POI is created and saved in the selected category.

## Using POIs to plan a route

When you plan a route, you can use a POI for the destination.

The following example shows how to plan a route to a car park in a city:

1. Tap **Navigate to...** in the Main menu.
2. Tap **Point of Interest**.
3. Tap **POI in city**.

---

**Tip:** The last POI you viewed on your PRO is also shown in the menu.

---

4. Enter the name of the town or city and select it when it is shown in the list.
5. Tap the arrow button to expand the list of POI categories.

---

**Tip:** If you already know the name of the POI you want to use, you can tap **Search POI** to enter the name and select this location.

---

6. Scroll down the list and tap **Car park**.

The car park closest to your destination is shown at the top of the list.

The following table explains the distances shown next to each POI. How the distance is measured varies depending on how you initially searched for the POI:

- POI near you - distance from your current location
- POI in city - distance from the city centre
- POI near Home - distance from your Home location
- POI along route - distance from your current location
- POI near destination - distance from your destination

7. Tap the name of the car park you want to use and tap **Done** when the route has been calculated.

Your TomTom PRO starts to guide you to the car park.

---

**Tip:** You can also use Local Search to find useful locations. For more information, about Local Search and other LIVE Services go to [tomtom.com/services](http://tomtom.com/services).

---

## Show POI on map

Show POI on map

Tap this button to select the types of Point of Interest (POI) you want to see on the map.

1. Tap **Show POI on map** in the Settings menu.
2. Select the POI categories you want to be shown on the map.  
Tap **Search** and use the keyboard to search for a category name.
3. Select whether you want POIs to be shown in 2D or 3D views of the map.
4. Tap **Done**.

Point of Interest locations are shown on the map as symbols.

## Calling a POI

Many of the POIs on your TomTom PRO include phone numbers. This means you can use your PRO to call the POI and plan a route to the location of the POI.

For example, you can search for a restaurant that serves South-East Asian cuisine, call to reserve a table and plan a route to the restaurant, and all using your PRO.

1. Tap the phone button in the Driving view.

If the button is not visible in the Driving view, tap **Make your own menu** in the settings menu and select **Call...** to display the button in the Driving view.

2. Tap **Point of Interest**.
3. Select how you want to search for the POI.

For example, if you want to search for a POI on your route, tap **POI along route**.

4. Tap the type of POI you want to call.

For example, if you want to call a cinema to reserve a ticket, tap **Cinema** and then select the name of the cinema you want to call. Then tap **Call** or **Dial** to make the phonecall.

Your PRO uses your mobile phone to call the POI.

## Setting warnings for POIs

You can set a warning sound or message to be played or displayed when you approach a selected type of POI, such as a petrol station.

The following example will show how to set a warning sound to be played when you are 250 metres from a petrol station.

1. Tap **Manage POIs** in the settings menu.
2. Tap **Warn when near POI**.
3. Scroll down the list and tap **Petrol station**.

---

**Tip:** To remove a warning, tap on the category name and then tap **Yes**. POI categories which have been set with a warning, have a sound symbol next to the category name.

---

4. Set the distance as 250 metres and tap **OK**.
5. Select **Sound effect** and then tap **Next**.
6. Select the warning sound for the POI and then tap **Next**.
7. If you only want to hear the warning when the POI is directly on a planned route, select **Warn only if POI is on route**. Then tap **Done**.

The warning is set for the selected POI category. You will hear a warning sound when you are 250 metres from a petrol station on your route.

## Manage POIs

**Manage POIs**

Tap this button to manage your POI categories and locations.

---

**Tip:** To report incorrect or missing information about an existing Point of Interest included with your map, use the Map Share service to share your corrections with the Map Share community.

---

You can set your PRO to let you know when you are near to selected POI locations. In this way, you could for example, set the device to let you know you when you are approaching a petrol station.

You can create your own POI categories and add your own POI locations to these categories.

This means you can for example, create a new POI category called, Friends. You could then add all your friend's addresses as POIs in this new category. If you add their phone numbers, you can call them on your mobile phone using the hands-free calling feature on your PRO.

Tap the following buttons to create and maintain your own POIs.

- **Add POI** - tap this button to add a location to one of your own POI categories.
- **Warn when near POI** - tap this button to set your PRO to warn you when you are near selected POIs.
- **Delete POI** - tap this button to delete one of your own POI categories.
- **Edit POI** - tap this button to edit one of your own POIs.
- **Add POI category** - tap this button to create a new POI category.
- **Delete POI category** - tap this button to delete one of your own POI categories.

## 31. Help

---

### About getting help

Tap **Help** in the Main menu or the Settings menu to navigate to emergency services centres and other specialist services and contact them by phone.

For example, if you are involved in a car accident, you could use the Help menu to call the nearest hospital and tell them your exact location.

### Using Help to phone a local service

To use Help to locate a service centre, contact the centre by phone and navigate from your current location to the centre, do the following:

1. Tap the screen to bring up the Main Menu.
2. Tap **Help** or tap **Settings**, then tap **Help**.
3. Tap **Phone for help**.
4. Select the type of service you require, for example, Nearest hospital.
5. Select a centre from the list, the nearest is shown at the top of the list.

Your PRO shows your position on the map along with a description of the location. This helps you explain where you are while making a call.

If a phone is connected to your PRO, your PRO automatically dials the phone number. If no phone is connected, the phone number is displayed for you to call.

6. To navigate your way to the centre by car, tap **Navigate there**. If you are on foot, tap **Walk there**.

Your PRO starts guiding you to your destination.

### Help menu options

**Note:** In some countries, information may not be available for all services.

**Phone for help**

Tap this button to find the contact details and location of a service centre.

**Drive to help**

---

Tap this button to navigate your way by car to a service centre.

#### Walk to help

Tap this button to navigate your way on foot to a service centre.

#### Where am I?

Tap this button to see your current location on the map. You can then tap **Phone for help** and select the type of service you want to contact and tell them your exact location.

#### Safety and other guides

Tap this button to read a selection of guides including a First Aid guide.

#### Product Manuals

---

Tap this button to read a selection of guides relating to your navigation device.

## 32. About hands-free calls

---

If you have a mobile phone with Bluetooth®, you can use your TomTom PRO to make phone calls and send and receive messages.

---

**Important:** Not all phones are supported or compatible with all features. For more information, go to [tomtom.com/phones/compatibility](http://tomtom.com/phones/compatibility).

---

### Connecting to your phone

First you must establish a connection between your mobile phone and your TomTom PRO.

Tap **Phone settings** in the settings menu, then tap **Manage phones** and select your phone when it is shown in the list.

You only need to do this once and your TomTom PRO will remember your phone.

---

**Tip:**

- Make sure that you switch on Bluetooth® on your phone.
- Make sure that your phone is set to 'discoverable' or 'visible to all'.
- You may have to enter the password '0000' on your phone in order to connect to your TomTom PRO.
- Save your TomTom PRO as a trusted device on your phone. Otherwise you need to enter '0000' every time you use the phone.

For additional information about Bluetooth® settings, refer to your mobile phone user guide.

---

### Making a call

When you have established a connection between your TomTom PRO and your mobile phone, you can use your PRO to make hands-free calls on your mobile phone.

To make a phone call, tap the phone button in the Driving View. Then tap one of the following buttons:

- Tap **Home** to call your Home location.

If you have not entered a number for your Home location this button is unavailable.

- Tap **Number** to enter a phone number to call.
- Tap **Point of Interest** to choose a Point of Interest (POI) to call.

If your PRO knows the phone number of a POI, this is shown next to the POI.

- Tap **Phonebook entry** to select a contact from your phonebook.

**Note:** Your phonebook is automatically copied to your PRO when you first establish a connection with your mobile phone.

Not all phones can transfer the phonebook to your PRO. For more information, go to [www.tomtom.com/phones/compatibility](http://www.tomtom.com/phones/compatibility).

- Tap **Recently dialed** to select from a list of people or numbers you have called recently using your PRO.
- Tap **Recent caller** to select from a list of people or numbers who called you recently.

Only calls you have received on your PRO are saved in this list.

## Receiving a call

When someone calls you, the caller's name and phone number are shown. Tap the screen to accept or reject the call.

## Auto-answer

You can set your TomTom PRO to automatically answer incoming phone calls.

To set automatic answering, tap **Phone settings** in the settings menu, then tap **Auto-answer settings**.

Select how long your PRO will wait before automatically answering your calls, then tap **Done**.

## Connecting more phones to your TomTom PRO

You can establish connections for up to 5 mobile phones.

To add more phones, do the following.

1. Tap **Phone settings** in the Main Menu.
2. Tap **Manage phones**.
3. Tap **Find other phone...** and follow the instructions.

To switch between phones, tap **Manage phones**. Then tap the button for the phone you want to connect to.

## Mobile phone menu

When you open the Mobile Phone menu, the following buttons are available:

	Tap this button to manage the mobile phones that will be connected to your PRO.
<b>Manage phones</b>	You can add a profile for up to five different mobile phones.
	Tap this button to put your TomTom PRO into flight mode.
<b>Flight mode</b>	
	Tap this button to change the auto-answer settings.
<b>Auto-answer settings</b>	

**Change Home  
number**

Tap this button to change your Home phone number.

**Disable  
Bluetooth**

Tap this button to disable Bluetooth on your TomTom PRO.

**Delete**

Tap this button to select information you want to delete. You can delete the list of recent callers and the list of recently dialled numbers.

---

## 33. Favourites

---

### About Favourites

Favourites provide an easy way to select a location without the need to enter the address. They do not need to be favourite places, they can simply be seen as a collection of useful addresses.

### Creating a Favourite

To create a Favourite, do the following:

1. Tap the screen to bring up the Main Menu.
2. Tap **Settings** to open the Settings menu.
3. Tap **Home and Favourites**.
4. Tap **Manage Favourites**.
5. Tap **Add**.
6. Select the type of the Favourite by tapping one of the buttons described below:

**Home**

You can set your Home location as a Favourite.

**Favourite**

You cannot create a Favourite from another Favourite. This option will always be unavailable in this menu.

To rename a Favourite, tap **Manage Favourites** in the Settings menu.

**Address**

You can enter an address as a Favourite.

**Recent destination**

Create a new Favourite by selecting a location from a list of your recent destinations.

---

 <p><b>Local Search</b></p>	<p>Tap this button to use TomTom Local Search with TomTom Places to find locations such as shops and businesses and save them as Favourites.</p> <p>For example, if you are looking for a swimming pool near your current location, enter 'swimming pool' and choose the best search result.</p>
 <p><b>Point of Interest</b></p>	<p>If you visit a POI you particularly like, for example a restaurant, you can add it as a Favourite.</p>
 <p><b>My location</b></p>	<p>Tap this button to add your current location as a Favourite.</p> <p>For example, if you stop somewhere interesting, while you are there you can tap this button to create the Favourite.</p>
 <p><b>Point on map</b></p>	<p>Tap this button to create a Favourite using the Map Browser.</p> <p>Select the location of the Favourite using the cursor, then tap <b>Done</b>.</p>
 <p><b>Latitude Longitude</b></p>	<p>Tap this button to create a Favourite by entering latitude and longitude values.</p>
 <p><b>Spoken address</b></p>	<p>Tap this button to create a Favourite by saying the address.</p>
 <p><b>Position of last stop</b></p>	<p>Tap this button to select your last recorded position as your destination.</p>

7. Your PRO suggests a name for your new Favourite. To enter a new name, there is no need to delete the suggested name, you just start typing.

---

**Tip:** It is a good idea to give your Favourite a name that is easy to remember.

---

8. Tap **OK**.

Your new favourite appears in the list.

After you have added two or more Favourites, you are asked whether you make regular trips to the same locations. If you tap **YES**, you can enter these destinations as your favourite destinations. Every time you switch on your device, you can immediately select one of these locations as your destination. To change these destinations or select a new destination, tap **Start-up settings** in the Settings menu, then select **Ask for a destination**.

## Using a Favourite

You can use a Favourite as a way of navigating to a place without having to enter the address. To navigate to a Favourite, do the following:

1. Tap the screen to bring up the Main Menu.

2. Tap **Navigate to...**
3. Tap **Favourite**.
4. Select a Favourite from the list.

You see your Favourite on the map. You can tap **Park nearby** to see a list of parking POIs near to your Favourite. You can also call the Favourite or see more information about it.

5. Tap Select to choose to navigate to this Favourite.

---

**Tip:** Use the left and right arrows to choose another Favourite from your list.

---

Your PRO calculates the route for you.

6. When the route is calculated, tap **Done**.

Your PRO will immediately start guiding you to your destination with spoken instructions and visual instructions on the screen.

### Changing the name of a Favourite

To change the name of a Favourite, do the following:

1. Tap the screen to bring up the Main Menu.
2. Tap **Settings** to open the Settings menu.
3. Tap **Manage Favourites**.
4. Tap the Favourite you want to rename.

---

**Tip:** Use the left and right arrows to choose another Favourite from your list.

---

5. Type in the new name and then tap **OK**.
6. Tap **Done**.

### Deleting a Favourite

To delete a Favourite, do the following:

1. Tap the screen to bring up the Main Menu.
2. Tap **Settings** to open the Settings menu.
3. Tap **Manage Favourites**.
4. Tap the Favourite you want to delete.

---

**Tip:** Use the left and right arrows to choose another Favourite from your list.

---

5. Tap **Yes** to confirm the deletion.
6. Tap **Done**.

## 34. LIVE Services

---

### About LIVE Services

There are a range of LIVE Services available for your TomTom PRO. These services are subscription-based and currently include the following:

- TomTom HD Traffic
- Speed Cameras
- Weather
- Local Search with TomTom Places
- QuickGPSfix™ (TomTom PRO 9xxx devices only)

### Regional availability

**Note:** LIVE services are only available in designated countries. In order to benefit from LIVE services, the respective WEBFLEET subscription is needed. For more information on available services in your country, go to **[business.tomtom.com/liveservices](https://business.tomtom.com/liveservices)**.

### Safety Notice

The following information applies only to TomTom PRO 9xxx devices.

Your TomTom navigation device contains a GSM/GPRS module which can interfere with electrical devices such as cardiac pacemakers, hearing aids and aviation equipment.

Interference with these devices may endanger the health or life of others.

Do not use your navigation device near unprotected electrical units or in areas where the use of mobile telephones is prohibited, such as hospitals and airplanes.

### About TomTom HD Traffic

TomTom HD Traffic is a unique TomTom service providing real-time traffic information.

In combination with IQ Routes, HD Traffic helps you plan the optimum route to your destination taking into account the current local traffic conditions.

Your TomTom PRO regularly receives information about the changing traffic conditions. If traffic jams or other incidents are found on your current route, your PRO will offer to replan your route to try and avoid any delays.

### About Local Search with TomTom Places

Using local search, you can search the TomTom Places listings to find shops and businesses, then plan a route to the destination you choose.

## Using local search

To find a location using local search and plan a route there, follow the steps below. In this example, you search for a supermarket near to your current position.

1. Tap the screen to bring up the Main Menu, then tap **Navigate to**.
2. Tap the **Local Search** button.
3. Tap **Search near you**.
4. Type 'supermarket' then tap **OK**.

The locations that match your search are shown in a list with their distance from your current location.

5. Tap one of the locations in the list.

The location is shown on the map.

Tap **Show info** to see more information about this location.

6. Tap **Select**.

Choose whether you want to navigate there, show the location on a map, travel via that location or add it as a favourite.

## About Speed Cameras

The Speed Cameras service warns you about the following roadside camera locations:

- Speed camera locations.
- Accident blackspot locations.
- Mobile speed camera locations.
- Average speed camera locations.
- Toll road camera locations.
- Traffic light camera locations.

## Other services

The following services are also available on your TomTom PRO:

### Weather

The Weather service gives you five-day weather reports for any location on your map.

### QuickGPSfix™

The following information applies only to TomTom PRO 9xxx devices.

QuickGPSfix contains information about GPS satellite positions which helps your TomTom PRO find your position faster.

## 35. Traffic information

---

### Introducing traffic information

You can receive traffic information in two ways:

- TomTom HD Traffic
- Traffic Message Channel (RDS-TMC)

Using traffic information, your TomTom PRO can automatically adjust your route to minimise any delays.

### About TomTom HD Traffic

TomTom HD Traffic is a unique TomTom service providing real-time traffic information.

In combination with IQ Routes, HD Traffic helps you plan the optimum route to your destination taking into account the current local traffic conditions.

Your TomTom PRO regularly receives information about the changing traffic conditions. If traffic jams or other incidents are found on your current route, your PRO will offer to replan your route to try and avoid any delays.

### Safety Notice

The following information applies only to TomTom PRO 9xxx devices.

Some TomTom navigation devices contain a GSM/GPRS module which can interfere with electrical devices such as cardiac pacemakers, hearing aids and aviation equipment.

Interference with these devices may endanger the health or life of you or others.

If your device includes a GSM/GPRS module, do not use it near unprotected electrical units or in areas where the use of mobile telephones is prohibited, such as hospitals and airplanes.

### About RDS-TMC

The Traffic Message Channel (TMC) also known as RDS-TMC, transmits traffic information as a radio signal and is available free of charge in many countries.

TMC is not a TomTom Service, but is available when using the TomTom RDS-TMC Traffic Receiver.

**Note:** *TomTom is not responsible for the availability or quality of traffic information provided by the Traffic Message Channel.*

*The Traffic Message Channel (TMC) is not available in all countries. To check the availability of TMC services in your country, go to [tomtom.com/traffic](http://tomtom.com/traffic).*

## Using Traffic information

The traffic sidebar is shown on the right side of the Driving view. The sidebar informs you about traffic delays while you drive, using glowing dots to show you where each traffic incident is located on your route.

The top of the traffic sidebar represents your destination and shows the total time delay due to traffic jams and other incidents on your route.

The central section of the traffic sidebar shows individual traffic incidents in the order they occur on your route.

The bottom of the traffic sidebar represents your current location and shows the distance to the next incident on your route.

To make the traffic sidebar more readable some incidents may not be shown. These incidents will always be of minor importance and only cause short delays.

The colour of the pointers, as shown below, gives you an instant indication of the type of incident:

Unknown or undetermined situation.

Slow traffic.

Queueing traffic.

Stationary traffic or road closure.

### Taking the fastest route

Your PRO regularly looks for a faster route to your destination. If the traffic situation changes and a faster route is found, your PRO will offer to replan your journey so you can use the faster route.

You can also set your PRO to automatically replan your journey whenever a faster route is found. To apply this setting, tap **Traffic settings** in the Traffic menu.

To manually find and replan the fastest route to your destination, do the following:

1. Tap the traffic sidebar.

**Tip:** If you find that tapping the sidebar opens the Main menu instead of the traffic menu, try tapping the sidebar with your finger resting on the edge of the screen.

2. Tap **Minimise delays**.

Your PRO searches for the fastest route to your destination.

The new route may include traffic delays. You can replan the route to avoid all traffic delays, but a route which avoids all delays will usually take longer than the fastest route.

3. Tap **Done**.

## Setting the radio frequency for RDS-TMC information

**Note:** *Not all devices support setting the radio frequency.*

If you know the frequency of a particular radio station you want to use for RDS-TMC traffic information, you can set the frequency manually. To activate this feature, you must first enable manual tuning.

1. Tap the Traffic bar in the Driving View, then tap **Traffic settings**.
2. Select **Tune manually by entering a frequency** and then tap **Done**.

Now you can enter the frequency of the radio station.

3. Tap the Traffic sidebar in the Driving View.
4. Tap **Tune Manually**.

5. Enter the frequency of the radio station.
6. Tap **Done**.

Your TomTom navigation device looks for your radio station. If it doesn't find a radio station at the frequency you set, it automatically continues to search for the next available station.

## Minimising delays

You can use TomTom HD Traffic to minimise the impact of traffic delays on your route. To minimise delays automatically, do the following:

1. Tap **Services** in the Main Menu.
2. Tap **Traffic**.
3. Tap **Traffic settings**.
4. Choose between always taking the faster route automatically, being asked or never changing your route.
5. Tap **Next** and then **Done**.

To manually minimise traffic delays at any time, do the following:

1. Tap the Traffic bar in the Driving View.
2. Tap **Minimise traffic delays**.

Your PRO plans the quickest route to your destination. The new route may include traffic delays and may remain the same as the original route.

You can re-plan the route to avoid all delays, but this route is unlikely to be the quickest possible route.

3. Tap **Done**.

## Making commuting to work easier

The **Home to work** or **Work to home** buttons in the Traffic menu lets you check your route to and from work with one tap of a button.

When you use either of these buttons, your device plans a route between your home and work locations and checks the route for possible delays.

The first time you use **Home to work**, you must set your traffic home and work locations.

**Change home-work**

1. Tap the traffic sidebar to open the Traffic menu.
2. Tap **Show home-work traffic**.
3. Set your home location and your work location.

If you have already set the locations and want to change them, tap **Change home-work**.

You can now use the **Home to work** and **Work to home** buttons.

***Note:** The home location you set here is not the same as the home location you can set in the **Settings Menu**. In addition, the locations you use here do not have to be your actual home and work locations. If there is another route that you often travel, you can set Work/Home to use these locations instead.*

For example, to check for delays on your route home before you leave the office, do the following:

1. Tap the traffic sidebar to open the Traffic menu.
2. Tap **Show home-work traffic**.
3. Tap **Work to home**.

The Driving View is shown and a message is displayed telling you about traffic incidents on this route. The Traffic sidebar also shows any delays.

### Getting more information about an incident

To check for delays on your route, tap **Show traffic on route** in the Traffic menu. Your navigation device shows a summary of the traffic delays on your route.

The total includes any delays due to traffic incidents and those due to busy roads, with information provided by IQ Routes.

Tap **Minimise delays** to check if you can reduce the delay.

**Note:** You can also access the **Show traffic on route** screen by tapping the traffic area of the **LIVE Route** summary tab.

Tap the left and right arrow buttons to move through each incident in turn, viewing the details of each one. This includes the type of incident, for example road works, and the length of delay caused by this incident.

You can also access the details about individual incidents by tapping **View map** in the Main Menu and then tapping on the traffic incident symbol.

When shown on the map, a traffic incident starts with an icon. In the case of a traffic queue, the direction of the incident is from the icon towards the other end.

### Checking traffic incidents in your area

Get an overview of the traffic situation in your area, using the map. To find local incidents and their details, do the following:

1. Tap the traffic sidebar to open the Traffic menu.
2. Tap **View map**.

The map overview screen is shown.

3. If the map does not show your location, tap the marker to centre the map on your current location.

The map shows traffic incidents in the area.

4. Tap on any traffic incident to get more information.

A screen is shown that gives you detailed information about the incident you chose. To display information about surrounding incidents use the left and right arrows at the bottom of this screen.

### Changing HD Traffic settings

Use the **Traffic settings** button to choose how HD Traffic works on your navigation device.

1. Tap the traffic sidebar to open the Traffic menu.

2. Tap **Traffic settings**.

3. To hear a beep sound when a new traffic incident occurs on your route, select **Report if traffic on route changes** and then tap **Done**.
4. If a faster route is found while you are driving, Traffic can replan your journey to use the faster route. Select one of the following options and then tap **Done**.
- **Always switch to that route**
  - **Ask me if I want to change**
  - **Never change my route**

## Traffic incidents

Traffic incidents and warnings are shown on the map, in the Driving View and on the Traffic sidebar.

There are two types of incident and warning signs:

- Symbols shown in a red square are traffic incidents. Your navigation device can replan to avoid them.
- Symbols shown in a red triangle are weather related. Your device does not replan to avoid these warnings.

Traffic incident symbols:

	<b>Accident</b>
	<b>Road works</b>
	<b>One or more lanes closed</b>
	<b>Road closed</b>
	<b>Traffic incident</b>
	<b>Traffic jam</b>

Weather related symbols:

	<b>Fog</b>
	<b>Rain</b>
	<b>Wind</b>

	<b>Ice</b>
	<b>Snow</b>

***Note:** The incident avoided symbol is shown for any traffic incident that you avoid using a traffic service.*

## Traffic menu

To open the Traffic menu, tap the Traffic sidebar in the Driving View or tap **Traffic** in the Services menu.

The following buttons are available:

### **Minimise traffic delays**

Tap this button to re-plan your route based on the latest traffic information.

### **Show home-work traffic**

Tap this button to calculate the quickest route from your home location to your place of work and back.

### **Show traffic on route**

Tap this button for an overview of traffic incidents along your route.

### **View map**

Tap this button to browse the map and see the traffic incidents shown on the map.

### **Change Traffic settings**

Tap this button to change your settings for how the Traffic service works on your device.

### **Read aloud traffic info**

Tap this button to hear spoken information about traffic incidents on your route.

***Note:** Your TomTom device must have a computer voice installed to read information aloud.*

## 36. Weather

---

### About Weather

The TomTom Weather service provides detailed weather reports and 5-day weather forecasts for towns and cities. The information is provided by local weather stations and is updated hourly.

### Requesting a weather report

To request a weather report for a specific location, such as the town or city for your final destination, do the following:

1. Tap **Services** in the Main Menu.
2. Tap **Weather**.
3. Tap **Weather near you** or **Weather near destination** to go directly to a weather summary.
4. Tap **Weather near other location** to choose your location using, for example, an address, Home, a Favourite or a POI.

A summary weather report for that location is shown. Tap on any day of the week for a detailed weather report.

### Types of location

You can request a weather forecast for different types of location. The following types of location are available:

**Home**

Tap this button to select your Home location.

**Favourite**

Tap this button to select a Favourite location.

---

**Address**

Tap this button to enter an address.

---

**Recent  
destination**

Tap this button to select a location in a list of recently used destinations.

---

**Local search**

Tap this button to select a location using a local search.

---

**Point of Interest**

Tap this button to select a Point of Interest (POI).

---

**My Location**

Tap this button to select your current location.

---

**Point on map**

Tap this button to select a point on the map.

---

**Latitude  
Longitude**

Tap this button to enter a latitude and longitude map reference.

---

**Spoken address**

Tap this button to enter an address by saying the address.

---

**Position of last  
stop**

Tap this button to select your last recorded position.

---

## 37. Speed Cameras

---

### About Speed Cameras

The Speed Cameras service warns you about the following roadside camera locations:

- Speed camera locations.
- Accident blackspot locations.
- Mobile speed camera locations.
- Average speed camera locations.
- Toll road camera locations.
- Traffic light camera locations.

### Speed camera warnings

By default, warnings are given 15 seconds before you reach a speed camera location.

You are warned in three ways:

- Your TomTom PRO plays a warning sound.
- The type of speed camera and your distance from the camera location is shown in the Driving View. If a speed restriction has been reported for the camera, the speed is also shown in the Driving View.
- The location of the speed camera is shown on the map.

**Note:** For average speed cameras, you are warned by a combination of icons and sounds at the start, middle and end of the average speed check zone.

---

**Tip:** To change the number of seconds or warning sound, tap **Alert settings** in the Speed Cameras menu.

---

## Changing the way you are warned

To change the way your TomTom PRO warns you about speed cameras, tap the **Alert settings** button.

You can then set how close you want to be to a speed camera before you are warned and what type of sound will be played.

For example, to change the sound that is played when you approach a fixed speed camera, do the following:

1. Tap **Services** in the Main Menu.
2. Tap **Speed Cameras**.
3. Tap **Alert settings**.

A list of speed camera types is displayed. A speaker is shown next to the speed camera types that have been set for an alert.

4. Tap **Fixed cameras**.
5. Tap **NO** to avoid removing the fixed speed camera alerts.
6. Enter the time in seconds for when a warning is given before you reach a camera. Then tap **OK**.
7. Tap the sound you want to be used for the warning.

---

**Tips:** To switch off warning sounds for a camera type, tap **Silence** in step 7 above. You still see a warning in the Driving View if you switch off the warning sound.

---

8. Tap **YES** to save your changes.

## Speed Camera Symbols

Speed cameras are shown as symbols on the Driving View.

When you approach an area where an alert is located, you see a symbol and a warning sound is played.

You can change both the warning sound and the number of seconds that the warning is issued before reaching the alert.

Fixed speed camera

Mobile speed camera

Traffic light camera

---

	Toll road camera
	Restricted road camera - located on a minor road that reduces traffic on a larger road
	Other camera
	Mobile camera hotspot
	Average speed check
	Accident black spot
	Bi-directional speed camera
	Ungated railway crossing

## Report button

To show the report button in the Driving View, do the following:

1. Tap **Services** in the Main Menu.
2. Tap **Speed Cameras**.
3. Tap **Enable report button**.
4. Tap **Done**.

The report button is shown on left-hand side of the Driving View or if you are already using the quick menu, it's added to the buttons available in the quick menu.

---

**Tip:** To hide the report button, tap **Disable report button** in the Speed Cameras menu.

---

## Reporting a new speed camera while on the move

1. Tap the report button shown in the Driving View or in the quick menu to record the location of the camera.

If you tap the report button within 20 seconds of receiving a speed camera warning, you get the option to add a camera or remove a camera. Tap **Add camera**.

2. Tap **Fixed camera** or **Mobile camera**, depending on the type of camera you are reporting.
3. Select the camera location on the map and confirm that it is correct.
4. Tap the type of fixed camera you want to report, for example, a traffic light camera.

**Note:** If the type of camera you choose has a speed restriction, you can also enter the speed.

A message confirms that your camera has been reported to the Speed Camera team at TomTom.

### Reporting a new speed camera while at home

You do not need to be at the location of a speed camera to report the new location. To report a new speed camera location while you are at home, do the following:

1. Tap **Services** in the Main Menu on your navigation device.
2. Tap **Speed Cameras**.
3. Tap **Report safety camera**.
4. Tap **Fixed camera** or **Mobile camera** depending upon the type of speed camera.
5. Use the cursor to mark the exact location of the camera on the map, then tap **Done**.
6. Tap **Yes** to confirm the location of the camera.
7. Tap on the type of camera you want to report and if necessary, choose the speed restriction for the camera.

You see a message confirming that your camera has been reported to the Speed Cameras team.

### Reporting incorrect camera alerts

You may receive an alert for a camera that is no longer there. To report an incorrect camera alert, do the following:

1. While you are at the location of the missing camera, tap **Report** in the Driving View.

**Note:** This must be done within 20 seconds of receiving the camera alert.

2. Tap **Remove**.

The next time you connect your navigation device to the TomTom website, the camera alert is reported as incorrect.

### Types of fixed speed camera you can report

When you report a fixed speed camera, you can select the type of fixed camera you are reporting.

These are the different types of fixed speed camera:

**Speed camera**

This type of speed camera checks the speed of passing vehicles.

**Traffic light camera**

This type of camera checks for vehicles breaking traffic rules at traffic lights.

**Toll road camera**

This type of camera monitors traffic at toll road barriers.

**Average speed check**

This type of speed camera checks the average speed of vehicles between two fixed points.

**Vehicle restriction**

This type of camera checks traffic on roads where access is restricted.

**Other camera**

All other types of camera that do not fall into any of the above categories.

---

### Average speed check camera warnings

There are several types of visual and audible warnings that you may see and hear when you meet an average speed check camera.

You always receive a start and end zone warning regardless of the speed you are travelling at. Intermediate warnings, if given, occur every 200 meters.

All the warnings are described below:

---

#### **Start of zone warning**

As you approach the start of an average speed check zone, you see a visual warning in the top left hand corner of the Driving View with a distance to the camera underneath it. You hear an audible warning.

You also see a small icon on the road showing the position of the average speed check camera at the start of the zone.

#### **Intermediate warning - type 1**

Once in the speed check zone, if you are not speeding and have already received a start of zone warning, you see a visual warning in the Driving View. This reminds you that you are still in the speed check zone.

#### **Intermediate warning - type 2**

Once in the speed check zone, if you are driving at over 100% of the permitted speed and have already received a start of zone warning, you see a visual warning in the Driving View indicating the maximum permitted speed. You also hear a small audible warning. These warnings are there to remind you to slow down...

---

### Intermediate warning - type 3

Once in the speed check zone, if you are driving at over 100% of the permitted speed and have not received a start of zone warning, you see a visual warning in the Driving View indicating the maximum permitted speed. You also hear a loud audible warning.

These warnings occur at the FIRST intermediate point only and are there to remind you to slow down...

### End of zone warning

As you approach the end of an average speed check zone, you see a visual warning in the Driving View with a distance to the camera shown underneath it. You hear an audible warning.

You also see a small icon on the road showing the position of the average speed check camera at the end of the zone.

---

## Speed Cameras menu

To open the Speed Cameras menu, tap **Services** in the Main Menu and then tap **Speed Cameras**.

### Report speed camera

Tap this button to report a new speed camera location.

### Alert settings

Tap this button to set the alerts you will receive and the sounds used for each alert.

### Disable alerts

Tap this button to disable alerts.

### Enable report button

Tap this button to enable the report button. The report button is shown in the Driving View or in the quick menu.

When the report button is shown in the Driving View, this button changes to **Disable report button**.

---

## 38. MyTomTom

### About MyTomTom

MyTomTom helps you manage the contents, maps and services of your TomTom PRO navigation device, as well as giving you access to the TomTom community. It is a good idea to frequently connect your navigation device to MyTomTom, to ensure you always have the latest updates. You can also log in to MyTomTom on the TomTom website.

---

**Tip:** We recommend using a broadband internet connection whenever you connect your navigation device to MyTomTom.

---

### Setting up MyTomTom

To set up MyTomTom, do the following:

1. Connect your computer to the internet.
2. Start a browser and go to **business.tomtom.com/getstarted**.
3. Click **Download now**.

Your browser downloads the MyTomTom support application, which you need to install on your computer in order to connect your device to MyTomTom. Follow the instructions on the screen if you are asked questions while downloading.

4. When prompted, connect the mount for your device to your computer using the supplied cable. Then place your device in the mount and switch your device on.

---

**Important:** You should plug the USB connector directly into a USB port on your computer and not into a USB hub or USB port on a keyboard or monitor.

---

Once the MyTomTom support application is installed, you can access MyTomTom from the notification area on your desktop.

---

**Tip:** When you connect your navigation device to your computer, MyTomTom tells you if there are any updates for your device.

---

## **MyTomTom account**

To download content and services from TomTom, you need a MyTomTom account. You can create an account when you start using MyTomTom.

**Note:** *If you have more than one TomTom device, you need a separate account for each device.*

## 39. Customer support

---

### Getting help to use your navigation device

You can find further online help at **[tomtom.com/support](http://tomtom.com/support)**.

### Status & information

**Status &  
information**

Tap this button to open the Status & information menu.

**Version  
information**

Tap this button to view technical information about your device, such as your serial number for your device and the TomTom App version.

**GPS Status**

Tap this button to see the current status for GPS reception.

## 40. Addendum

---

### Important Safety Notices and Warnings

#### Global Positioning System

The Global Positioning System (GPS) is a satellite-based system that provides location and timing information around the globe. GPS is operated and controlled under the sole responsibility of the Government of the United States of America which is responsible for its availability and accuracy. Any changes in GPS availability and accuracy, or in environmental conditions, may impact the operation of your TomTom device. TomTom does not accept any liability for the availability and accuracy of GPS.

#### Use with Care

Use of a TomTom device for navigation still means that you need to drive with due care and attention.

#### Aircraft and Hospitals

Use of devices with an antenna is prohibited on most aircraft, in many hospitals and in many other locations. A TomTom device must not be used in these environments.

#### Taking care of your TomTom device

Do not leave your TomTom device or TomTom accessories on view when you leave your car. They may become an easy target for thieves.

You can set a password for your device which must be entered every time you start your device.

We recommend that you use the safety preferences on your TomTom device, where available. The safety preferences are available in the Preferences menu.

Take care of your TomTom device and clean it correctly.

- Use a soft cloth to wipe the screen of your device; do not use any liquid cleaners.
- If your device gets wet, dry it with a soft cloth.
- Do not open the casing of your device under any circumstances. Doing so may be dangerous and will invalidate your warranty.
- If your device includes a memory card, do not use the memory card with any device other than a TomTom device. Other devices may damage the memory card.
- Do not expose your device to high or low temperatures, which can cause permanent damage. For example, don't leave it in the car on hot summer days or during cold winter nights.

#### Battery

This product uses a Lithium-Polymer battery. Do not use it in a humid, wet and/or corrosive environment. Do not put, store or leave your product in or near a heat source,

in a high temperature location, in strong direct sunlight, in a microwave oven or in a pressurized container, and do not expose it to temperatures over 60 C (140 F). Failure to follow these guidelines may cause the Lithium-Polymer battery to leak acid, become hot, explode or ignite and cause injury and/or damage. Do not pierce, open or disassemble the battery. If the battery leaks and you come into contact with the leaked fluids, rinse thoroughly with water and seek medical attention immediately. For safety reasons, and to prolong the lifetime of the battery, charging will not occur at low (below 0 C/32 F) or high (over 45 C/113 F) temperatures.

Temperatures: Standard operation: -0 C (32 F) to +45 C (113 F); short period storage: -20 C (-4 F) to + 60 C (140 F); long period storage: -20 C (-4 F) to +25 C (77 F).

**Caution: risk of explosion if battery is replaced by an incorrect type.**

Do not remove or attempt to remove the non-user-replaceable battery. If you have a problem with the battery, please contact TomTom customer support.

THE LITHIUM-POLYMER BATTERY CONTAINED IN THE PRODUCT MUST BE RECYCLED OR DISPOSED OF PROPERLY ACCORDING TO THE LOCAL LAWS AND REGULATIONS AND ALWAYS SEPARATE FROM HOUSEHOLD WASTE. BY DOING THIS YOU WILL HELP CONSERVE THE ENVIRONMENT. USE YOUR TOMTOM ONLY WITH THE SUPPLIED DC POWER LEAD (CAR CHARGER/BATTERY CABLE), AC ADAPTER (HOME CHARGER), IN AN APPROVED CRADLE OR USING THE SUPPLIED USB CABLE TO CONNECT TO A COMPUTER FOR BATTERY CHARGING.

Please use this device with the charger provided.

For replacement chargers, go to **tomtom.com** for information about approved chargers for your device.

The stated battery life is a maximum possible battery life. The maximum battery life will only be achieved under specific atmospheric conditions. The estimated maximum battery life is based on an average usage profile.

For more information, see **tomtom.com/batterytips**.

## CE Marking

This equipment complies with the requirements for CE marking when used in a residential, commercial, vehicular or light industrial environment, achieving all the appropriate provisions of the relevant legislation in the EU.

**CE0168**

## R&TTE directive

Hereby, TomTom declares that TomTom personal navigation devices and accessories are in compliance with the essential requirements and other relevant provisions of the EU Directive 1999/5/EC. The declaration of conformity can be found here: **www.tomtom.com/legal**.

## WEEE directive

This symbol on the product or its packaging indicates that this product shall not be treated as household waste. In line with EU Directive 2002/96/EC for waste electrical and electronic equipment (WEEE), this electrical product must not be disposed of as unsorted municipal waste. Please dispose of this product by returning it to the point of sale or to your local municipal collection point for recycling.

## Connected networks

Devices that contain a GSM module are intended for connection to the following networks:

GSM/GPRS 900/1800

## Exposure limits

This device complies with radiation exposure limits set forth for an uncontrolled environment. In order to avoid the possibility of exceeding the radio frequency exposure limits, human proximity to the antenna shall not be less than 20cm (8 inches) during normal operation.

## C-tick

**N14644**

The TomTom PRO 71xx displays the C-tick to show it complies with relevant Australian and New Zealand regulations.

## A-tick

**N14644**

The TomTom PRO 91xx displays the A-tick to show it complies with relevant Australian and New Zealand regulations.

## Customer Support contact

Australia: 1300 135 604

New Zealand: 0800 450 973

Malaysia 1800815318

Singapore 8006162269

Thailand 0018006121008

Indonesia 0018030612011

## Warning for Australia

The user needs to switch off the device when exposed to areas with potentially explosive atmospheres such as petrol stations, chemical storage depots and blasting operations.

## This Document

Great care was taken in preparing this manual. Constant product development may mean that some information is not entirely up to date. The information in this document is subject to change without notice.
